
Standard checking account

Standard Checking Account check-writing privileges provide convenient, limited access to the cash in accounts.

The check-writing feature includes:

- The first set of 50 standard checks is complimentary.
- The ability to track check payee information with payee keying.
- Client budget planning is easy with expense tracking codes.

Expense coding details

A box for the check expense code is printed on each check next to the memo line. The standard expense codes are listed on the back of the check register and are also listed below. Clients can add up to six personalized codes. Please note that the check payee and expense coding features do not apply to IRA checking clients.

Contact your financial advisor to complete the Standard Checking application. For additional cash management features, including debit cards and online bill pay, contact your financial advisor about an Investment Access[®] Account.

Expense codes		
Standard codes	Personalized codes
