

# Turkish Turbulence Triggers Global Tremors

August 2018

SEI New ways.  
New answers.®

- Trade tensions have ratcheted up, sending the post-2004 Turkish lira spiraling to a record low.
- Global risk assets, especially emerging markets, fell in sympathy.
- We do not foresee a major disruption for U.S. investors; Turkey only accounts for 0.8% of global equity-market capitalization and only 0.5% of U.S. banks' total foreign claims.

Trade tensions ratcheted up after President Donald Trump authorized the doubling of steel and aluminum tariffs on Turkey as a consequence of a diplomatic impasse over an imprisoned U.S. citizen. Consequently, the new post-2004 Turkish lira spiraled downward, hitting a record low versus the U.S. dollar and most other currencies. The lira has since recovered somewhat. However, it remains down approximately 40% for the year, while bond yields have shot up and foreign currency reserves have contracted—pushing Turkey closer to the brink of a financial crisis. Global risk assets fell in sympathy, with protracted declines in emerging markets. On Wednesday, August 15, 2018, Turkey retaliated, doubling import taxes on U.S. goods. On Thursday, the lira rallied after Qatar announced a \$15 billion funding package for Turkey.

The situation in Turkey has rekindled concerns about the eurozone's financial sector, sparking a selloff in bank stocks due to their exposures to Turkish loans. Europe's biggest lenders have skin in the game, and regulators have warned that increased weakness in the Turkish lira would lead to defaults on foreign loans. A weaker currency exacerbates conditions by making it more difficult for indebted Turkish companies to pay back loans denominated in foreign currencies. Turkish banks have to service roughly \$7.6 billion in bonds by the end of next year.

## Our View

Turkey represents only 1.5% of global gross domestic product and accounts for 0.8% of global equity-market capitalization (based on its representation in the MSCI ACWI Index). While Turkey's crisis may be rippling through global markets, we do not foresee a major lasting disruption.

Issues of this nature serve as valuable reminders of the importance of diversification. We believe that a diversified approach to portfolio construction can help limit the fallout from country- and region-specific shocks. It's therefore important that investors carefully consider all investment options and make selections that suit their individual needs and goals.

## Background

Turkey's financial troubles predated the recent tariff threats; these were just the so-called straw that broke the camel's back, sending the Turkish government into crisis-management mode. President Recep Tayyip Erdogan won re-election in late June, enabling him to consolidate his grip on Turkish institutions with new policymaking powers due to a 2017 constitutional referendum. He has demonstrated a disinterest in central-bank independence and tended to favor policies that prioritize domestic investment over financial stability. As a result, Turkey faces a high level of foreign debt, a large current-account deficit, and rising borrowing costs—all of which threaten to undermine Turkey's financial system and economy.

U.S. banks' total risk exposure to Turkey (that is, claims, derivatives, guarantees and credit commitments) amounted to approximately \$33 billion at the end of the first quarter of 2018, according to the Bank for International Settlements. U.S. banks have about 0.5% of their total foreign claims at risk in Turkey.

## Our Portfolios<sup>1</sup>

SEI's Emerging Markets Debt Funds (SIIT and SIT) held small overweights to Turkish debt and underweights to the Turkish lira.

Our Emerging Markets Equity Funds (SIIT and SIT), our SIIT World Equity Ex-US and SIIT Screened World Equity Ex-US Funds) held small overweights to Turkey.

The SIT International Equity Fund held small off-benchmark positions in Turkey.

As for benchmark exposure, a 50/50 blend of the JP Morgan EMBI and GBI Emerging Market Debt Indexes held just over 4% in Turkish debt and 2.5% lira exposure as of July 31, 2018. Turkish companies made up roughly 0.70% of the MSCI Emerging Markets Equity Index, 0.17% of the MSCI ACWI ex-USA Index, and 0.08% of the MSCI World Index.

### Exhibit 1: Turkey: Fund vs. Benchmark

Fund Name	Fund Exposure (%)	Benchmark Name	Benchmark Exposure (%)
SIIT Emerging Markets Debt Fund	5.70	50/50 JPM EMBI Global Div & JPM GBI EM Global Div	4.22
SIIT Emerging Markets Equity	0.96	MSCI EFM (Emerging+Frontier Markets) Index (Net) (USD)	0.68
SIIT World Equity Ex-US Fund	0.25	MSCI ACWI ex-USA (Net) (USD)	0.17
SIMT Multi-Strategy Alternative Fund	0.12	ICE BofAML US 3-Month Treasury Bill Index (USD)	-
SIT Emerging Markets Debt Fund	5.56	50/50 JPM EMBI Global Div & JPM GBI EM Global Div	4.22
SIT Emerging Markets Equity Fund	1.17	MSCI Emerging Markets Index (Net) (USD)	0.69
SIT International Equity Fund	0.01	MSCI EAFE Index (Net) (USD)	-
SIT International Fixed Income Fund	(0.13)	Bloomberg Barclays Global Aggregate ex-USD Index, Hedged (USD)	0.00
AMT Tactical Offensive Equity	0.07	Bloomberg Barclays Global Aggregate ex-US Index, Hedged (USD)	0.07
AMT Tactical Offensive Fixed Income	0.63	Bloomberg Barclays US Aggregate Bond Index (USD)	0.47

## Index Definitions:

**Bloomberg Barclays US Aggregate Bond Index:** The Bloomberg Barclays US Aggregate Bond Index is a benchmark index composed of U.S. securities in Treasury, Government-Related, Corporate and Securitized sectors. It includes securities that are of investment-grade quality or better, have at least one year to maturity and have an outstanding par value of at least \$250 million.

**ICE BofAML US 3-Month Treasury Bill Index:** The ICE BofAML US 3-Month Treasury Bill Index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.

**JP Morgan EMBI Index:** The JP Morgan EMBI Index is a total return, unmanaged trade-weighted index for U.S. dollar-denominated emerging-market bonds, including sovereign debt, quasi-sovereign debt, Brady bonds, loans and Eurobonds.

**JP Morgan GBI emerging market debt indexes:** The JPMorgan EMBI Global Diversified Index tracks the performance of external debt instruments (including U.S.-dollar-denominated and other external-currency-denominated Brady bonds, loans, Eurobonds and local-market instruments) in the emerging markets.

**MSCI ACWI Index:** The MSCI ACWI Index is a market-capitalization-weighted index composed of over 2,000 companies, and is representative of the market structure of 48 developed and emerging-market countries in North and South America, Europe, Africa and the Pacific Rim. The index is calculated with net dividends reinvested in U.S. dollars.

**MSCI ACWI ex-USA Index:** The MSCI ACWI ex-USA Index includes both emerging-market countries and developed markets, excluding the United States.

**MSCI Emerging Markets Equity Index:** The MSCI Emerging Markets Index is a free float-adjusted market-capitalization-weighted index designed to measure the performance of global emerging-market equities.

**MSCI EFM (Emerging+Frontier Markets) Index:** The MSCI Emerging + Frontier Markets (EFM) Index captures large and mid-cap representation across 24 Emerging Markets (EM) countries and 29 Frontier Markets (FM) countries\*. With 1,252 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

**MSCI World Index:** The MSCI World Index is a free float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of 24 developed-market country indexes.

## **Important Information**

*This material represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events, or a guarantee of future results. This information should not be relied upon by the reader as research or investment advice and is intended for educational purposes only.*

*There are risks involved with investing, including loss of principal. Diversification may not protect against market risk. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. These risks may be magnified further with respect to “frontier market countries,” which are a subset of emerging market countries with even smaller national economies.*

For those SEI Funds which employ the ‘manager of managers’ structure, SEI Investments Management Corporation (SIMC) has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee the sub-advisers and recommend their hiring, termination and replacement.

SEI Investments Management Corporation (SIMC) is the adviser to the SEI funds, which are distributed by SEI Investments Distribution Co (SIDCo). SIMC and SIDCo are wholly owned subsidiaries of SEI Investments Company.

**To determine if the Funds are an appropriate investment for you, carefully consider the investment objectives, risk factors and charges and expenses before investing. This and other information can be found in the Funds’ summary and full prospectuses, which may be obtained by calling 1-800-DIAL-SEI. Read it carefully before investing.**
