Annualized Rate of Return for the Period Ending March 31, 2024

Time Period	Conestoga Small Cap Equity Composite Total Net Return	Russell 2000 Growth Total Return
1 Year	12.63%	20.35%
3 Years	1.17%	-2.68%
5 Years	9.31%	7.38%
10 Years	10.89%	7.89%
Since Inception (12/31/98)	11.42%	6.99%

Conestoga Capital Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS) and has prepared and presented this report in compliance with the GIPS standards. Conestoga Capital Advisors, LLC has been independently verified for the periods December 31, 1998 through March 31, 2023 by independent verifiers.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Conestoga Small Cap Equity Composite ("Composite") has had a performance examination for the periods December 31, 1998 through March 31, 2023. The verification and performance examination reports are available upon request.

A complete list and description of all composites and policies for valuing portfolios, calculating and reporting returns, and preparing GIPS reports are available upon request. Performance results are presented after all actual investment management fees, custodial fees, commissions, and other trading expenses. Computations assume the reinvestment of all dividends and capital gains. Portfolios are valued monthly, and returns are weighted by using beginning-of-quarter values plus weighted cash flows. Annual returns are calculated by geometrically linking the monthly returns. Performance results for the full historical period are total net return, time-weighted rates of return expressed in U.S. dollars. Trade date accounting is used for all periods. No leverage has been used in the accounts included in the Composite. The actual return and value of an account will fluctuate and at any point could be worth more or less than the amount invested. Individual account performance will vary according to individual investment objectives.

All fee-paying discretionary portfolios will be assigned to an appropriate composite according to investment objective. Composites will include new portfolios at the start of the next performance measurement period (i.e. the beginning of the next month) after the portfolio comes under management and will exclude terminated portfolios after the last full calendar month period the portfolios were under management (i.e., the end of the last full calendar month), but composites will continue to include terminated portfolios for all periods prior to termination.

The Russell 2000 Index is comprised of the smallest 2000 companies in the Russell 3000 Index, representing approximately 10% of the Russell 3000 total market capitalization. Conestoga removed the Russell 2000 Index as a secondary benchmark for the Composite on 9/30/2022. The benchmark for the Composite is the Russell 2000 Growth Index, which measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values. The volatility of the Russell 2000 Growth Index may be materially different from that of the Composite. In addition, the Composite's holdings may differ significantly from the securities that comprise the Russell 2000 Growth Index. For comparison purposes, the Composite is measured against the Russell 2000 Growth Indices. (Source: Russell)

UMA assets presented are not part of Conestoga's GIPS-defined firm assets as Conestoga has no trading authority over these assets and serves in an advisory-only capacity. UMA assets under management are received on a preliminary quarterly basis, which are subject to change by the plan sponsor after a complete reconciliation of the underlying accounts. The "Total Assets" include UMA assets and are not part of the GIPS firm assets. UMA and Total Assets are shown as supplemental information.

The current management fee schedule is as follows: Up to \$25,000,000 = 1.00%; Over \$25,000,000 = Negotiable.

The dispersion of annual returns is measured by the standard deviation across equal-weighted portfolio returns represented within the Composite for the full year. Dispersion is shown as "N/A" for periods less than one year and for periods with 5 or fewer composite members for the entire year.

As of December 31, 2023, the three-year standard deviation, calculated net of fees, for the Composite was 19.87% and the Russell 2000 Growth was 21.79%. As of December 31, 2022, the three-year standard deviation, calculated net of fees, for the Conestoga Small Cap Equity Composite was 22.47% and the Russell 2000 Growth was 26.20%. As of December 31, 2021, the three-year standard deviation, calculated net of fees, for the Composite was 18.93% and the Russell 2000 Growth was 23.07%.

Conestoga Capital Advisors, LLC is an independent registered investment advisory firm specializing in small and mid cap portfolio management. Performance results prior to June 30, 2001 have been achieved by Martindale Andres & Company, Inc., William Martindale and Robert Mitchell's prior investment advisory firm. The Conestoga Small Cap Equity Composite creation date and inception date is December 31, 1998. The Composite contains portfolios which primarily invest in small cap equities. In addition, for an account to be included in the Composite, no more than 20% of the portfolio will (i) have a market capitalization outside the range of the Russell 2000 Index; or (ii) be outside of the small capitalization model. In addition, the weighting of an individual security within a given account cannot exceed 10% (or 2.5 times the target weighting defined in the small capitalization model portfolio) of the equity assets. Portfolios that are less than \$250,000 in size at inception are not included in this Composite. Prior to September 30, 2003, portfolios greater than \$100,000 were included in this Composite. As of December 31, 2021, the Composite definition was redefined. Previously, the market capitalization size range was calculated using a rolling 3-year average of the Russell 2000 Growth Index. Portfolios will not be removed from the assigned composite if they fall below the minimum simply due to market depreciation. There have not been any material changes in the personnel responsible for managing accounts during the time period. **Past performance is not indicative of future results.**
