

January 9, 2023

Stocks retreated in the first trading week of 2024, struggling a bit after a celebratory end to last year as investors second-guessed Fed signals and fretted over lingering inflation concerns.

New Year Blues

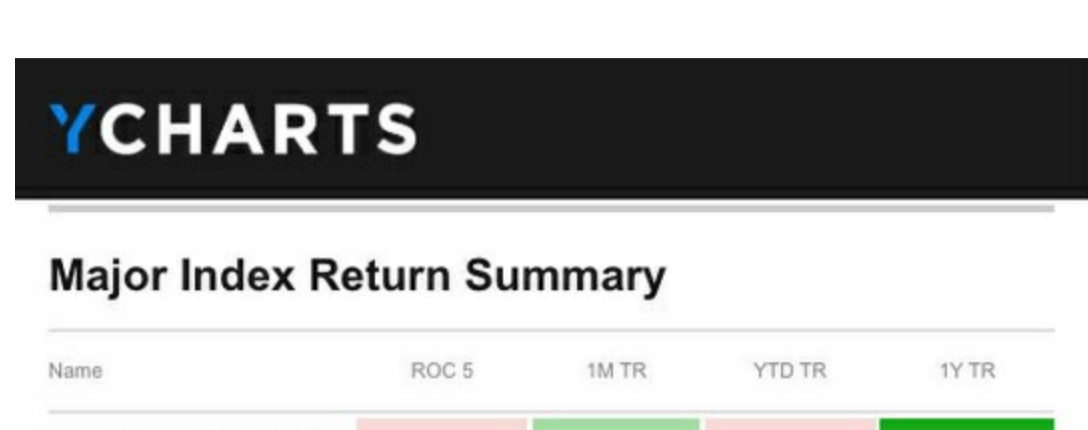

Stocks got off to a rough first week of the new year, with tech names leading the week's decline. Several market observers called it the "reverse Goldilocks" effect, where the market decided investors were getting a little too excited over the prospect of a Fed rate cut.

Stocks bounced up and down each of the four trading days but ended each one down—except Friday, when the Dow Industrials, Nasdaq Composite, and S&P 500 all ended the day in the green when jobs data helped soften the week's slide.^{1,2}

All About the Fed

On Wednesday, manufacturing news came in better than expected, lifting markets until the December Federal Open Market Committee meeting minutes were released, revealing that the Fed members had discussed rate cuts for 2024 but in no specific terms.

Jobs and services sector news painted a better picture of the economy on Thursday, but as the 10-year Treasury hit 4%, stock prices responded negatively.

YCHARTS

Major Index Return Summary

Name	ROC 5	1M TR	YTD TR	1Y TR
Dow Jones Industrial Average	-0.65%	3.80%	-0.56%	16.25%

Jobs Data in Focus

Finally, employment data helped buffer the week on Friday, as employers added 216,000 new jobs in December, besting estimates from economists and surpassing the 173,000 jobs added in November. News of unemployment remaining steady at 3.7% also helped sentiment.^{3,4}

This Week: Key Economic Data

- Tuesday:** International Trade in Goods.
- Wednesday:** EIA Petroleum Status Report.
- Thursday:** Jobless Claims. Consumer Price Index. Treasury Statement.
- Friday:** Producer Price Index.

Companies may reschedule when they report earnings without notice.

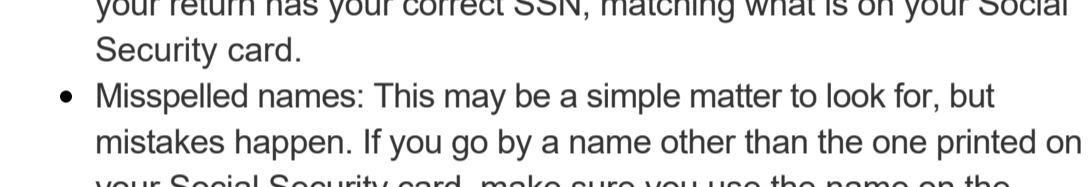

FOOD FOR THOUGHT

"It is always a silly thing to give advice, but to give good advice is absolutely fatal."

—Oscar Wilde

TAX TIP

Errors to Avoid When Filing Your Extended Tax Return

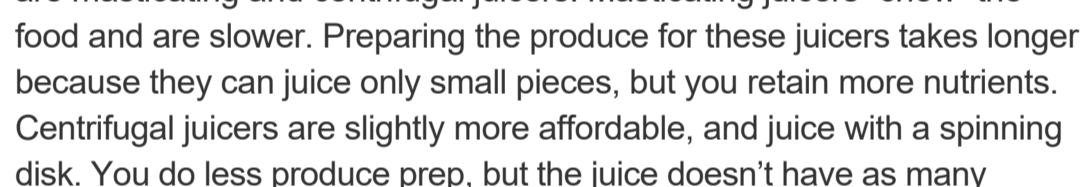

If you file an extension of your tax return, it's essential to avoid the common errors described below to submit a complete and accurate tax return:

- **Missing or inaccurate Social Security number (SSN):** Make sure your return has your correct SSN, matching what is on your Social Security card.
- **Misspelled names:** This may be a simple matter to look for, but mistakes happen. If you go by a name other than the one printed on your Social Security card, make sure you use the name on the card.
- **Filing status:** Claiming the wrong filing status can invalidate your return. Choose the correct option (electronic filing software can prevent mistakes). The interactive tax assistant tool can also help to determine your filing status and any relevant credits you should (or should not) claim.
- **Math errors:** Simple addition and subtraction mistakes can delay your return. Consider using electronic filing software that does the math automatically to avoid mistakes.
- **Incorrect bank account information:** If you opt to receive your refund via direct deposit, provide the correct bank account information. Giving an incorrect account number can delay your refund even further.
- **Unsigned forms:** Lastly, you should double-check that all sections of your forms are signed. Missing signatures can delay your return.

HEALTHY LIVING TIP

A Beginner's Guide to Juicing

Juicing is a fantastic way to get some extra fruits and veggies into your diet, especially on those busy days when you can't find time to make a nutritious meal. Plus, it's easy to start and reap the many benefits.

First, decide what kind of juicer you want. The two most common types are masticating and centrifugal juicers. Masticating juicers "chew" the food and are slower. Preparing the produce for these juicers takes longer because they can juice only small pieces, but you retain more nutrients. Centrifugal juicers are slightly more affordable, and juice with a spinning disk. You do less produce prep, but the juice doesn't have as many nutrients.

Next, you need to decide what to juice. You'll learn which fruits and veggies yield the most juice and which choices combine well with others, but here are two simple recipes to get you started:

Green Juice

- Celery
- Cucumber
- Apple/pineapple/orange/lemon
- Spinach/kale

Purple Juice

- Beets (you can juice the green tops as well)
- Kale
- Carrots

You can add ginger, turmeric, or even garlic to give your juice extra flavor and kick.

WEEKLY RIDDLE

It has avenues, rivers, and parks, but no grass, water, or asphalt. What is it?

Last week's riddle: Victor is assigned to paint suite numbers on doors at an office building with 100 suites, which will be numbered from 1 to 100. How many times will he have to paint the number 8? Answer: 20 times - 8, 18, 28, 38, 48, 58, 68, 78, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 98.

The market indexes discussed are unmanaged, and generally, considered representative of their respective markets. Index performance is not indicative of the past performance of a particular investment. Indexes do not incur management fees, costs, and expenses. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results.

The Dow Jones Industrial Average is an unmanaged index that is generally considered representative of large-capitalization companies on the U.S. stock market. Nasdaq Composite is an index of the common stocks and similar securities listed on the NASDAQ stock market and is considered a broad indicator of the performance of technology and growth companies. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) and serves as a benchmark of the performance of major international equity markets, as represented by 21 major MSCI indexes from Europe, Australia, and Southeast Asia. The S&P 500 Composite Index is an unmanaged group of securities that are considered to be representative of the stock market in general.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
