
Stocks See a Mixed Week

Weekly Update – July 20, 2020

The Week on Wall Street

Stocks were mixed last week as investors reacted to positive economic data, progress on a COVID-19 vaccine, and the continued nationwide increase in COVID-19 cases.

The Dow Jones Industrial Average gained 2.29%, while the Standard & Poor's 500 rose by 1.25%. But the Nasdaq Composite Index dropped 1.08% for the week. The mega-cap technology companies saw some profit-taking last week, sending the Nasdaq Composite to its first loss in three weeks. The MSCI EAFE Index, which tracks developed stock markets overseas, ended 2.19% higher.^{1,2,3}

Stocks Find a Way Higher

After a Monday rally melted away on news that California was rolling back its reopening plans amid rising infections, a new earnings season began on a hopeful note. Stocks posted back-to-back daily gains on the strength of positive earnings surprises from a few money center banks and encouraging news about progress in the development of a COVID-19 vaccine.⁴

Despite a strong retail sales number, new jobless claims and rising U.S.-China tensions reminded investors that global economic recovery remains fragile, leading stocks to pare some of the week's earlier gains.^{5,6}

Earnings Season Begins

While investors long ago accepted the idea that this earnings season would be ugly, reflecting the impact of the economic shock due to COVID-19, it didn't mean that there weren't important insights to be gained from this quarter's earnings reports.

Three money center banks last week kicked off the earnings season, reporting substantial declines in profits and an additional cumulative \$28 billion set aside for loan-loss reserves.⁷

Banks are an important economic bellwether since they touch every part of the U.S. economy. Although their earnings were significantly lower, they actually beat consensus Wall Street estimates, which encouraged investors and set the stage for stocks to move higher. The story on this quarter's earnings season, however, is far from finished as investors await the stream of companies releasing their quarterly results in the days and weeks ahead.

THIS WEEK: KEY ECONOMIC DATA

Wednesday: Existing Home Sales.

Thursday: Index of Leading Economic Indicators. Jobless Claims.

Friday: New Home Sales.

Honey Mustard & Onion Pretzel Bites

6 to 8 servings

Some people have a sweet tooth, some have a salty tooth, and some have a snack tooth! If you just can't get enough snacks, this recipe is for you.

Ingredients:

- 12 oz. of sourdough hard pretzels
- $\frac{1}{3}$ cup vegetable oil
- $3\frac{1}{2}$ Tbsp. honey
- 2 Tbsp. yellow mustard
- $1\frac{1}{2}$ tsp. onion powder

Directions:

1. Preheat the oven to 275° F.
2. In a bowl, mix together the oil, honey, yellow mustard, and onion powder.
3. Break the pretzels up into smaller bits and toss the pretzels in the mixture, making sure to generously coat every piece.
4. Spread the pretzels in an even layer on a baking sheet and bake for 30 minutes, tossing the pretzels halfway through.

501(c)(3) Organizations vs. 501(c)(4) Organizations: What's the Difference?

Whether you're donating to a local animal shelter, a soup kitchen, or an arts program, it feels great to give back. There are many different types of organizations to support. Let's look at two of the most common:

- 501(c)(3) organizations are nonprofit organizations that are dedicated to religious, charitable, or educational purposes. Donations to 501(c)(3) organizations may be tax deductible. These organizations may not attempt to influence legislation or participate in any campaign activity for or against political candidates.
- 501(c)(4) organizations are social welfare groups that can engage in more lobbying and advocacy. Contributions to 501(c)(4) organizations may not be tax deductible.

It's important to know what kind of organization you are donating to if you want to know if your contributions can be tax deductible.

Don't Forget to Breathe

Take a deep breath and feel what happens. Did your chest rise? Well, that means that you're actually breathing inefficiently. Breathing with your chest delivers quick, shallow breaths. With these kinds of breaths, you'll be tired after just the front nine!

Instead, try to breathe with your belly. This may help your game because you may get more oxygen to your brain and muscles. This is also helpful when you hit a bad shot and feel your stress and anxiety rising. And any golfer knows that a good score and stress don't go hand in hand. A few deep, belly breaths will have you hitting straight in no time! Plus, you can use this tip on and off the course.

Yoga for Stability

You don't have to pull out the yoga mat and get your designer leggings on to enjoy some of the many benefits of this relaxing practice. Even if you've never done yoga before, these poses may help you improve your balance and stability:

- **Knee to Chest** - Start by standing with your feet hip-width apart with your hands on your hips. This is called mountain pose. Now, lift your left knee to hip height so your upper leg (thigh) is parallel with the floor. Flex your left foot and hold this pose for 3 deep breaths. Repeat on the other side.
- **Tree Pose** - Start with the same mountain pose as the first movement. Now, shift your weight into your left foot, and allow your right knee to turn out to the side as you bring your right foot in to rest at your left ankle, shin, or thigh depending on what's comfortable. Make sure you're not putting your foot on the joint itself.
- **Dancer Pose** - Start in mountain pose. Bend your right knee and slowly lift your right foot off the ground. As you do that, lift your left arm to balance yourself. Hold for 3 breaths and repeat on the other side.

What Does it Take to Become USDA-Certified Organic?

It seems like nearly every product in the grocery store has an organic option, but what does "organic" really mean? Are all organic products created equal?

When looking at organic produce, there is one certification that stands above the rest: USDA organic. To get this certification, a farm or business must:

- Adopt organic practices that apply to soil quality, animal raising practices, pest control, and use of additives.
- Submit an application to the USDA.
- The certifying agency then conducts an on-site review of the operation.

- If the applicant complies with the USDA organic regulations, a certificate is issued.

USDA organic businesses may also have to reapply for their certification to ensure that they are still adhering to organic practices. Now you know why a clamshell of organic strawberries is always more expensive!
