

## INTEGRITY ADVISORS PENSION CONSULTANTS

***Integrity Advisors Pension Consultants*** is a 65 year old family run specialist firm in the industry of qualified plan design as a tax shelter structural tool for the highly profitable private business owner community. Due to the last 15 + years of increasing tax legislation in this area, the incentives and possibilities behind 6, 7, & 8 figure legal qualified deductions are on the table once again.

Integrity has always lead with tax and a value added consulting approach and not by your mainstream, one size fits all, academic, prototypical, asset platform conversation. Integrity prides themselves in being the 1 out of 10 educational conversation as a resource to the high income tax paying communities, often being the value added foot in the door to the various other extensions of their practice. (IE: high end pre-tax & after-tax consulting, high & ultra-high net worth estate planning, qualified & after tax money management, fund & alternative management, fundamental financial consulting etc.)

Integrity works with the high income tax exposure clientele regardless of the nature, whether it be a deli, a hedge fund or anything in between. When the family is not sitting with direct clientele they spend their time in the center of influence markets (IE: business advisors, tax advisors, CPA's, attorneys, brokers etc.). As a practice they are blessed to be able to serve the end client with a quality, not quantity relationship. It often grows through their lifetime and inter-generationally.

Although spending majority of their time in the Tri-State community they work nationwide and welcome the opportunity to develop new friendships and business relationships. Their exploitation of the internal revenue code and what can be done for the business owner and ultra-high net worth communities continue to keep them ahead of the curve and a valuable resource to their close inner circles.
