Earnings Ignite Rally

Fears over inflation, supply shortages, and slowing economic growth in China were pushed aside last week as investors reacted to a daily succession of positive corporate earnings surprises. After the Dow Industrials reached an all-time high intraday on Wednesday, fresh earnings reports, an increase in existing home sales, and a new pandemic low in initial jobless claims—and continuing claims—propelled the S&P 500 index to a new record high the following session.^{4,5}

Disappointing earnings before the market opened on Friday hurt a few social media stocks, resulting in a choppy trading session and a selloff in the Nasdaq to close out the week.

Solid Start To Season

Investors came into the earnings season anxious about whether businesses could extend the earnings growth momentum of recent quarters amid an increase in Delta infections, inflation, labor shortages, and supply-chain bottlenecks. The early results were encouraging. Of the 23% of companies comprising the S&P 500 index that have reported, 84% beat Wall Street consensus earnings estimates by an average of more than 13%.⁶

The earnings season may get more uneven in coming weeks since many of the companies potentially affected by labor shortages and inflation have yet to report. Nevertheless, these better-than-expected earnings buoyed investor spirits and allowed stocks to build on their October gains.

Tax Tips on Identity Theft

Here are a few things to know when attempting to protect yourself against identity thieves:

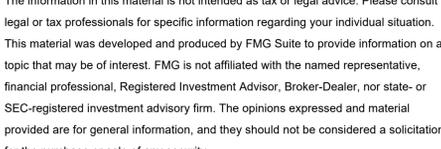

The IRS never will contact you via email or phone to request personal information. If you receive a scam email or call that claims to be from the IRS, report it to phishing@irs.gov.

People can steal your identity by stealing your wallet or purse, receiving information they need over the phone or email, finding your personal information in the trash, or accessing information you provide to an unsecured website (only enter credit card information on websites that start with "http://").

Your identity may have been stolen if you receive a letter from the IRS indicating that more than one tax return was filed in your name.

The Health Benefits of a Meat-Free Day

There's no denying the overwhelming health benefits of a plant-based diet. You still can enjoy such a diet's many health benefits by going "meat free" for just one day a week. Here are some of the main benefits:

- You'll be cutting out potentially dangerous processed meats – According to the World Health Organization, processed meats rank alongside cigarettes as a major cause of cancer.
- You'll be decreasing your risk of heart disease – Coronary heart disease is linked to a meat-based diet, and most cardiovascular diseases can be prevented by switching to a plant-based diet.
- You'll be getting more vitamins, minerals, and fiber – When you don't turn to meat on your meat-free day, you'll likely turn to other foods such as veggies, fruits, whole grains, and other plant-based products. This variety helps you round out your diet!
