

10-year treasury yields spiked last week sending the stock markets down, the S&P 500 fell 2.45% for the week¹. Fed Chairman Powell spoke to congress and calmed investors concerned about higher rates as well as inflation, noting the Fed commitment to keeping rates low and inflation is not a concern at this time. MarketWatch noted the ISM Manufacturing Index hit a 2-year high, growing at its fastest pace since the start of the pandemic². Reuters reported many corporate executives are feeling bullish about the economy as

vaccines are distributed and the weather heats up³. Johnson and Johnson's vaccine were approved for distributions and the bond market calmed on Monday sending the markets surging, putting them on-track for their best one-day rise since June⁴. Hopefully, we'll recoup the drop from last week quickly and get back to growth.

Tax season is in full swing and 1099's from most custodians are now out in the mail, or downloadable from online accounts. If you have a 1099 with the notation of "preliminary", make sure to watch for a final copy as some items may have changed. Have a discussion with your tax advisor to see if any changes need to be considered for the upcoming year. Remember, you have until April 15 to add funds to your IRA's and HSA's for additional tax savings. Have questions about your accounts? Give me a call to discuss.

In this week's recap: Rising bond yields deliver a blow to stocks; Fed Chair affirms commitment to current money policy.

Weekly Economic Update

Presented by Charles D. Vercellone, ChFC March 1, 2021

THE WEEK ON WALL STREET

Stocks dropped amid rising long-term bond yields, with sharp declines in high-valuation growth stocks leading the overall market lower.

The Dow Jones Industrial Average slipped 1.78%, while the Standard & Poor's 500 declined 2.45%. The Nasdaq Composite index, home to many high-valuation growth plays, fell 4.92% for the week. The MSCI EAFE index, which tracks developed overseas stock markets, edged up 0.37%.^{1,2,3}

RISING RATES DERAIL STOCKS

The 10-year Treasury yield climbed last week, from 1.34% to 1.42%, sending shudders through the stock market. While investors generally understand that economic strength may lead to higher bond yields, it was the speed at which bond yields rose that proved unsettling. Generally, when yields rise, bond prices tend to fall.⁴

Rising yields also drove sector rotation, with economic reopening stocks (e.g., energy, financials, and industrials) outperforming stay-at-home stocks, especially many of the big technology names.

The trend of higher yields was mitigated by testimony on Tuesday and Wednesday by Fed Chair Jerome Powell. He provided some assurances that the Fed remained committed to its current easy money policy stance.⁵

A surge in yields on Thursday, however, sparked a new wave of anxiety and a broad retreat that left market averages lower for the week.

POWELL TESTIMONY CALMS INVESTORS

Concerns over rising long-term bond yields and inflationary pressures were eased by two days of testimony by Fed Chair Powell. Powell reiterated the Fed's intention to stick with its near-zero short-term interest rate policy and monthly bond purchase program until the labor market fully recovers and its inflation goals are met.

Powell dismissed market fears of accelerating inflation, noting that he did not see inflation reaching any troubling levels, declaring that any increase would be modest and transitory. He

added that the Fed would likely allow inflation to spend some time above its 2% target rate. Inflation for the past eight years straight has been below that target.⁵

TIP OF THE WEEK

If marriage gives you a new last name, be sure to notify Social Security, your bank, and the investment and insurance companies with whom you have accounts and policies about the name change.

THE WEEK AHEAD: KEY ECONOMIC DATA

Monday: Institute for Supply Management (ISM) Manufacturing Index.

Wednesday: Automated Data Processing (ADP) Employment Report. Institute for Supply Management (ISM) Services Index.

Thursday: Jobless Claims. Factory Orders.

Friday: Employment Situation Report.

Investing involves risks, and investment decisions should be based on your own goals, time horizon, and tolerance for risk. The return and principal value of investments will fluctuate as market conditions change. When sold, investments may be worth more or less than their original cost.

The forecasts or forward-looking statements are based on assumptions, may not materialize, and are subject to revision without notice.

The market indexes discussed are unmanaged, and generally, considered representative of their respective markets. Index performance is not indicative of the past performance of a particular investment. Indexes do not incur management fees, costs, and expenses. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results.

The Dow Jones Industrial Average is an unmanaged index that is generally considered representative of large-capitalization companies on the U.S. stock market. Nasdaq Composite is an index of the common stocks and similar securities listed on the Nasdaq stock market and is considered a broad indicator of the performance of technology and growth companies. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) and serves as a benchmark of the performance of major international equity markets, as represented by 21 major MSCI indexes from Europe, Australia, and Southeast Asia. The S&P 500 Composite Index is an unmanaged group of securities that are considered to be representative of the stock market in general.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
