

# Sparrow Growth Fund

www.sparrowcapital.com

CLASS A: SGFFX | CLASS C: SGFCX | NO-LOAD: SGNFX

**Philosophy:** At the heart of the Sparrow Growth Fund investment is the belief that above average earnings per share growth creates shareholder value. Based on this fundamental principle, the fund is a highly diversified, multi-cap growth portfolio for investors who seek long-term capital appreciation

## Fund Objective

The Fund's objective is to generate a highly diversified, multi-capitalization, growth stock portfolio for investors who seek capital appreciation.

## Investment Strategy

The Sparrow Growth Fund is a diversified portfolio that seeks long-term capital appreciation. The advisor to the fund is Sparrow Capital Management, a Registered Investment Advisor. The Fund may invest in stocks of all market capitalization ranges, it is anticipated that the majority of the Fund's investments will be in common stocks of growth companies. The advisor seeks to limit investment risk by diversifying the fund's investments across a broad range of economic sectors.

## Focus on stocks with:

- Positive earnings and organic revenue growth
- Improving fundamentals
- Attractive risk/reward characteristics
- Prices at a reasonable discount to the firm's estimate of their intrinsic value
- Shareholder friendly management teams, strong balance sheets, and free cash flow

## Growth of \$10,000: Ending September 30, 2021

The S&P 500 Index is an unmanaged free-float capitalization-weighted index which measures the performance of 500 large-cap common stocks actively traded in the United States. Because the fund does not seek to replicate the S&P 500 Index, the Fund's returns may differ from those of the index.

Read it carefully before investing.

## Principal Risks of Investing in the Fund

All mutual funds carry a certain amount of risk. An investment in the Fund is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund is not a complete investment program. As with any mutual fund investment, the Fund's return will vary and you could lose money. The following are the principal risks of investing in the Fund:

- **Market Risk.** Overall stock market risks may affect the value of the Fund. Factors such as domestic economic growth and Market conditions, interest rate levels, and political events affect the securities markets and could cause the Fund's share price.
- **Company Risk.** The value of the Fund may decrease in response to the activities and financial prospects of an individual Company in the Fund's portfolio. The value of an individual company can be more volatile than the market as a whole.
- **Management Risk.** If the adviser's assessment of the prospects for individual securities is incorrect, it could result in significant losses in the Fund's investment in those securities, which can also result in possible losses overall for the Fund.
- **Mid Cap Risk.** Stocks of mid-cap companies are riskier than stocks of larger companies. Many of these companies are young and have a limited track record. Their securities may trade less frequently and in more limited volume than those of more mature companies. Mid-Cap companies also may lack the managerial, financial or other resources necessary to implement their business plans or succeed in the face of competition.
- **Small Cap Risk.** To the extent the Fund invests in small-cap companies, the Fund will be subject to additional risks. These include:
  - The earnings and prospects of smaller companies are more volatile than larger companies.
  - Smaller companies may experience higher failure rates than do larger companies.
  - The trading volume of securities of smaller companies is normally less than that of larger companies and therefore, may disproportionately affect their market price, tending to make them fall more in response to selling pressure than is the case with larger companies.
  - Smaller companies may have limited markets, product lines or financial resources and may lack management experience.
- **Sector Risk.** If the Fund's portfolio is over-weighted in a certain industry sector, any negative development affecting that sector will have a greater impact on the Fund than a fund that is not over-weighted in that sector.
