We've certainly had our share of market volatility. But the fact remains that economic uncertainty – in the United States and abroad – can spur volatility in the financial markets. And often it's a case of *when* and not *if* it happens.

It's only natural to be concerned when the market drops. And yet, even during turbulent times, you can more comfortably ride out a financial storm *if* you're prepared and have sound financial strategies in place.

Come to our educational seminar and discover time-tested methods that could enhance your investing potential in today's markets. By using sound investment approaches, you might avoid making emotion-based mistakes during times of volatility.

There is no fee for the seminar, and you'll receive a full-color, 20-page workbook packed with information that will help you take a good look at your personal situation and evaluate your options.
