

CYBERMAN365

CYBERMAN365 IDNOTIFY EXPLAINED

Protect your family with our comprehensive digital monitoring and security. Also, rely on our ID Restoration and Insurance coverage when you need it most.

Cyberman365 IDNotify has coverage options for individuals and families:

ADULT

Take back control of your data with our comprehensive digital monitoring.

ADULT+CHILDREN

Protect your family with our additional child digital monitoring options.

HOW CYBERMAN365 IDNOTIFY WORKS

PROTECT

Set Up Monitoring

Trust IDNotify to protect your digital wellbeing. We provide continuous monitoring of your personal data, whether financial, medical or social. Any level of exposure to your personal information is detrimental which is why we scan the dark web (known for selling stolen personal data) for your details. If someone tries to use your Social Security Number you will know about it.

ALERT

Instant Alerts

Receive instant alerts via text or email if an identity thief uses your personal data to open a new account or verify your identity. IDNotify's 24/7 monitoring and alert system puts you back in control of your data and allows you to act before its too late, minimizing the potential damage a fraudster could cause.

RESOLVE

ID Restoration Support & Insurance

If you become a victim of identity theft, a U.S. based Fraud Resolution Agent will deliver step by step support to investigate and restore your identity. Our Limited Power of Attorney option allows our agents to manage recovery on your behalf, helping to alleviate a stressful situation. You are covered up to \$1 million for certain eligible expenses associated with ID theft.

CYBERMAN365

CYBERMAN365 HOMESAFE EXPLAINED

HomeSafe is always watching over your network and devices for cyber vulnerabilities and will suggest improvements to strengthen your security posture. In the event of a cybersecurity incident, we will work to remediate the situation, restore your device or provide compensation to make you whole.

HOUSEHOLD

Defend your home against cyber attacks.

HOW CYBERMAN365 HOMESAFE WORKS

PROTECT

Scan and Monitor the Home Network

Download the Cyberman365 HomeSafe app, connect your network and register your 'Internet of Things' devices. Our system will then simulate possible cyber attacks allowing us to uncover vulnerable access points for the connected devices in your home. Following our analysis of your home network, HomeSafe will be activated providing 24/7 monitoring services for potential cyber threats.

ALERT

Increase Your Cyber Resilience

HomeSafe will scan your IoT devices and network to identify how you can make improvements to your home security. We will then provide step by step instructions for you to follow so you can implement preventative measures to further reduce your chances of a cyber incident.

RESOLVE

Cyber Incident Management and Compensation

In the event of a security incident, a unique artificial intelligence will handle the initial attack phases. For high-level threats an expert human response team is on hand to take over the network and stop the attack. Depending upon the severity of the attack, the HomeSafe solution will either restore your device, network, data or pay to replace it completely.
