One Against War

Jeanette Rankin was the first woman elected to the House of Representatives. A Republican from Montana, she vowed to represent women and children all over the country.

Rankin was sworn in on April 2, 1917. Just four days later, the House faced a historic vote on whether or not to declare war against Germany.

Rankin voted no.

"I want to stand behind my country," she said, "but I cannot vote for war." Her decision resulted in a barrage of criticism. The *New York Times* said it was "final proof of the

feminine incapacity for straight reasoning." Rankin was defeated at the next election.

After more than twenty years working as a lobbyist for peace, Rankin was elected to a second term in 1940. After Japan bombed Pearl Harbor, Rankin faced another vote on a declaration of war.

Once again, she voted no. That made her the only member of Congress to vote against war with Japan, and the only one to vote against U.S entry into both World War 1 and World War II. "As a women I can't go to war, and I refuse to send anyone else," she said. Unfriendly epithets rained on her from all quarters. She was called a "Skunk," a "traitor," and a "Nazi." Again her vote led to her defeat at the polls.

No one ever called Jeanette Rankin a flip-flopper. In 1968, at the age of eighty-seven, she led a march on Washington to oppose what she called the "ruthless slaughter" in Vietnam. At the end of her life she was asked if she would have done anything differently. "Yes," she said. "I would have been nastier."

The Greatest War Stories Never Told By Rick Beyer

Weekly Market Commentary September 28, 2020

The Markets

For four weeks, the U.S. stock market has sparked and sputtered like a campfire in light rain.

Today, pandemic-driven demand is providing fuel for the investors. The need for certain types of products and services has accelerated and innovation is creating new opportunities. Consider:

- **Technology.** Today, digital technologies support nearly all group interactions, which has accelerated innovation. Traditional video communications platforms are in high demand, and multi-person virtual platforms are emerging. Robotics innovations are racing ahead, too. Robotic dogs enforce social distancing in Singaporean parks, reported *Accenture*. Other types of robots sanitize streets and facilitate contactless delivery around the globe.
- **Consumer products and services.** COVID-19 increased demand for staples, cleaning, and personal hygiene products. The virus may have inspired deeper and longer-lasting changes in consumer behavior, too. *Accenture* reported people are favoring healthier lifestyles, consuming goods more conscientiously, and showing a preference for locally-sourced goods.
- **Healthcare, drug development/delivery, and medical equipment.** Last Friday, 316 COVID-19 treatments and 212 vaccines were in development around the

world, reported the *Milliken Institute*. In some places, humans are collaborating with artificial intelligence to streamline drug discovery processes. Demand for telehealth services has increased dramatically. So has demand for personal protective equipment, reported Pankaj Singh of *Plastics Today*.

Throughout 2020, investors' enthusiasm has pushed markets higher. However, concerns about a variety of issues have dampened enthusiasm in recent weeks. Last Friday, Ben Levisohn of *Barron's* reported:

"In a week filled with headlines about government stimulus (or the lack thereof), Supreme Court nominations, the election, the gain in the Nasdaq...suggests that it was the fear of another COVID-19 wave that really got the market down. And for good reason. The week began with the U.K. talking about a second shutdown and ended with all of Europe facing down a second wave of infection...In the U.S., the number of cases is rising and the death toll passed 200,000 midweek..."

Many of these concerns aren't likely to dissipate soon, and volatility is likely to continue.

Last week, the Standard & Poor's 500 Index and Dow Jones Industrial Average lost value, while the Nasdaq Composite gained value.

Data as of 9/25/20	1-Week	Y-T-D	1-Year	3-Year	5-Year	10-Year
Standard & Poor's 500 (Domestic Stocks)	-0.6%	2.1%	10.5%	9.7%	11.8%	11.2%
Dow Jones Global ex-U.S.	-4.2	-7.9	-0.2	-1.5	3.5	1.7
10-year Treasury Note (Yield Only)	0.7	NA	1.7	2.2	2.2	2.5
Gold (per ounce)	-4.7	22.1	21.5	12.9	10.2	3.7
Bloomberg Commodity Index	-3.2	-12.6	-10.4	-6.1	-4.4	-6.6

S&P 500, Dow Jones Global ex-US, Gold, Bloomberg Commodity Index returns exclude reinvested dividends (gold does not pay a dividend) and the three-, five-, and 10-year returns are annualized; and the 10-year Treasury Note is simply the yield at the close of the day on each of the historical time periods.

PREPARING FOR A PANDEMIC HALLOWEEN. In many neighborhoods across the United States, Halloween decorations have begun to appear. If you've been wondering whether Halloween celebrations and trick-or-treating are possible when the COVID-19 virus is still spreading across the country and the world, you may be interested in the Halloween guidelines issued by the *Centers for Disease Control*.

Low risk activities:

- Carving or decorating pumpkins at home and displaying them
- Carving or decorating pumpkins outside, at a safe distance, with neighbors or friends
- Decorating your house, apartment, or living space
- Holding a virtual Halloween costume contest
- Having a Halloween movie night at home with your family or roommates
- Having a Halloween scavenger hunt with lists of Halloween-themed things to look

- for while walking outdoors, at a safe distance from other participants
- Having a scavenger-hunt style trick-or-treat event with your household members in or around your home instead of trick-or-treating from house to house

Moderate risk activities:

- Participating in one-way trick-or-treating. Individually wrapped treats are lined up for families to take while remaining at a safe social distance (end of a driveway or at the edge of a yard)
- Small group, outdoor, open-air costume parades or parties with participants remaining at safe social distances (six feet apart)
- Going to an open-air, one-way, walk-through haunted forest where appropriate mask use is enforced, and people can remain more than six feet apart (if screaming is likely, distances should be increased)
- Having an outdoor Halloween movie night with local family friends with people spaced at least six feet apart (again, if screaming is likely, distances should be increased)

With a little planning, everyone can have a safe and fun Halloween.

Weekly Focus - Think About It

"In three words, I can sum up everything I've learned about life. It goes on. In all the confusions of today, with all our troubles...with politicians and people slinging the word fear around, all of us become discouraged...tempted to say this is the end, the finish. But life - it goes on. It always has. It always will. Don't forget that."

--Robert Frost, Poet, on his 80th birthday in 1954

* Government bonds and Treasury Bills are guaranteed by the U.S. government as to the timely payment of principal and interest and, if held to maturity, offer a fixed rate of return and fixed principal value. However, the value of fund shares is not guaranteed and will fluctuate.

* Corporate bonds are considered higher risk than government bonds but normally offer a higher yield and are subject to market, interest rate and credit risk as well as additional risks based on the quality of issuer coupon rate, price, yield, maturity, and redemption features.

* The Standard & Poor's 500 (S&P 500) is an unmanaged group of securities considered to be representative of the stock market in general. You cannot invest directly in this index.

* All indexes referenced are unmanaged. The volatility of indexes could be materially different from that of a client's portfolio. Unmanaged index returns do not reflect fees, expenses, or sales charges. Index performance is not indicative of the performance of any investment. You cannot invest directly in an index.

* The Dow Jones Global ex-U.S. Index covers approximately 95% of the market capitalization of the 45 developed and emerging countries included in the Index.

* The 10-year Treasury Note represents debt owed by the United States Treasury to the public. Since the U.S. Government is seen as a risk-free borrower, investors use the 10-year Treasury Note as a benchmark for the long-term bond market.

* Gold represents the afternoon gold price as reported by the London Bullion Market Association. The gold price is set twice daily by the London Gold Fixing Company at 10:30 and 15:00 and is expressed in U.S. dollars per fine troy ounce.

* The Bloomberg Commodity Index is designed to be a highly liquid and diversified benchmark for the commodity futures market. The Index is composed of futures contracts on 19 physical commodities and was launched on July 14, 1998.

* The DJ Equity All REIT Total Return Index measures the total return performance of the equity subcategory of the Real Estate Investment Trust (REIT) industry as calculated by Dow Jones.

* The Dow Jones Industrial Average (DJIA), commonly known as "The Dow," is an index representing 30 stock of companies maintained and reviewed by the editors of The Wall Street Journal.

* The NASDAQ Composite is an unmanaged index of securities traded on the NASDAQ system.

* International investing involves special risks such as currency fluctuation and political instability and may not be suitable for all investors. These risks are often heightened for investments in emerging markets.

* Yahoo! Finance is the source for any reference to the performance of an index between two specific periods.

* The risk of loss in trading commodities and futures can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition. The high degree of leverage is often obtainable in commodity trading and can work against you as well as for you. The use of leverage can lead to large losses as well as gains.
