

Life Insurance You Don't Have to Die to Use

Life insurance was originally designed to protect a family against the financial burdens that accompany the premature death of a breadwinner. That is still the case but times and life insurance has changed. Wealth Management Strategies or (WMS) still offer numerous companies alternatives for short term or permanent life insurance. The difference is there are now many, choices that can make your life insurance plan more than for use in case of a death.

You Don't Have to Die Before Getting Benefits From Your Insurance Plan!

Life Insurance designed for use while you are still alive! Many smart financial planners (including WMS) are using life insurance as an asset class. Mark Turner the president of WM Strategies Corp. has been helping individuals in this area for over 25 years. Life insurance is not your typical grandfathers whole life plan anymore.

Turning a Life Insurance Policy into an ASSET CLASS

Many individuals, professionals, business owners and corporations have found out that by utilizing some of the newer types of life plans they can provide numerous benefits for themselves and or their key employees.

The newer type of plans can be used for many needs that occur in Life including:

- Annuity Alternative
- Eliminate Stock Market Downturns
- Guaranteed Floor or Base Interest
- Growth Potential (up to 14.5% Caps)
- Income (Potentially for Life)
- Tax Deferral of Gains in the plan
- CD and Money Market Alternative
- Protection if you pass

Protection from Future Tax Increases with the Potential Tax Free Income (when designed correctly)

This plan excels, the higher your tax bracket and the more that safety and conservative growth is important to you. There is no way we can share all the opportunities available in this short overview. We still believe you need protection from death but we try to minimize that cost by Choosing the right plan for you, your business or your employees.
