

THE POWER OF PASSIVE[®]

Welcome to a more sophisticated approach
to diversifying your investments.

You've worked hard for your money, so now's the time to enjoy your success in the manner and lifestyle that fits you best.

But while enjoying your success today, you need to plan for tomorrow. Together we can build a strategy that's specially designed to help you secure your financial well-being both for now, and for the future.

By analyzing decades of research we believe that investment success is primarily the product of portfolio construction and the efficiency of capitalism itself.

A SINGULAR APPROACH TO PORTFOLIO CONSTRUCTION.

Predicting the movement of the markets, maneuvering in and out of asset classes, and identifying the best times to buy or sell stocks and bonds are the core goals of active managers. Unfortunately, we believe these goals are very difficult to achieve.

So, instead of attempting to outsmart the markets, we build diversified portfolios that offer investors broad exposure to all markets. Some may refer to this as passive investing, but there's nothing passive about engineering a portfolio designed to deliver a more sophisticated, less expensive approach to benefiting from the built-in efficiencies of the markets.

MORE DIVERSIFICATION, MORE OPPORTUNITIES.

We believe that if you're going to consistently benefit from the markets, you need to be invested across all of them, all of the time. This means not just investing in hundreds of stocks but thousands of them, not just across the U.S. market, but across the world. This approach to broad diversification allows you to take advantage of different types of investments and how they react differently to the same market conditions. When one goes up, you'll be there to reap the gains, and when another goes down, you'll never be overly exposed to its losses.

Diversification seeks to improve performance by spreading your investment dollars into various asset classes to add balance to your portfolio. Using this methodology, however, does not guarantee a profit or protect from loss in a declining market.

THE ART OF CHOOSING RISKS WISELY.

To optimize returns, we believe there are some risks that may be worth pursuing. By applying research from some of the world's leading academics to guide how we weight our portfolios, we place an emphasis on stocks over bonds, value stocks over growth stocks, and small company stocks over large company stocks. While we diversify across all asset classes, we strategically weight exposure to investments that may offer the potential to optimize returns for fairly-priced risk. Realize that different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy will either be suitable or profitable for your portfolio.

EFFICIENCY AND TRANSPARENCY.

While we believe in designing portfolios that are highly diversified, we also believe they should be highly efficient. We go to exceptional lengths to minimize every fraction of returns lost to income taxes, transaction costs and other inefficiencies. We employ a mix of funds designed to avoid unnecessary transactions and therefore manage costs at the fund level and the portfolio level. And, because we maintain allocations rather than tinkering with them, you know what you're invested in at all times.

GET THE BALL ROLLING.

If you're looking for a more rational and disciplined approach to investing, the Power of Passive may be right for you. We can help customize a solution to meet your needs and harness the Power of Passive to help you reach your investment goals.

For limitations to passive investing please see disclosure.

Mitchell Wealth Management Group

Mitchell Wealth Management Group, LLC is an independent financial services firm based in Winston-Salem, North Carolina. Our mission is to be a trusted advisor and resource for our clients. We strive to help our clients build and protect their wealth for their lifetime, and if desired, help establish their financial legacy. Our experience, knowledge and trusted partnerships enable our firm to offer investment guidance and strategies to meet the many and diverse needs of today's investors.

We welcome the opportunity to meet and discuss your investment goals and strategies.

Securities offered through Securities America, Inc., Member FINRA/SIPC, Myron Mitchell CRPC, Registered Representative, Advisory Services offered through Securities America Advisors, Inc., Myron Mitchell CRPC, Investment Advisor Representative, Mitchell Wealth Management Group, LLC, Symmetry Partners, LLC, and the Securities America Companies are independently owned companies.

Our firm utilizes Symmetry Partners, LLC in the power of passive approach to portfolio construction. Symmetry Partners, LLC is an investment advisory firm registered with the Securities and Exchange Commission. Symmetry charges an investment management fee for its services. All Symmetry Partners fees can be found in the ADV Part 2A located on the Symmetry Partners website, www.symmetrypartners.com. Diversification seeks to reduce volatility by spreading your investment dollars into various asset classes to add balance to your portfolio. Using this methodology, however, does not guarantee a profit or protection from loss in a declining market. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy will either be suitable or profitable for your portfolio. You and your advisor should carefully consider your suitability depending on your situation. Symmetry follows a passive investment strategy that involves limited ongoing buying and selling actions. Passive investors will purchase investments with the intention of long-term appreciation and limited maintenance. Passively managed portfolios are designed to closely track their respective benchmark index rather than seek out performance. As a result, the portfolio may hold securities regardless of the current or projected performance of a specific security or a particular industry or market sector. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the portfolio to lose value if the market as a whole falls.
