A couple of thoughts regarding retirement accounts as we enter the homestretch for 2017...

If we haven't already done so, SWA will be processing Required Minimum Distributions (RMD) for all of our advisory clients.

If you have a regular or traditional IRA and are age 70 ½ or older, you may need to take a Required Minimum Distribution (RMD) by December 31st. If you inherited an IRA you may need to take an RMD as well. Check with SWA for RMD calculations, combining more than one IRA, and how to handle an existing 401k if you are retired or still working.

If you are contributing to your employer's retirement plan such as a 401k or 403b and want to maximize your annual contributions, you can contribute up to \$18,000 this year (\$24,000 if you are at least age 50 by the end of the year). Check with your employer or send SWA your most recent paystub to see if you need to bump up your contributions for the remainder of 2017.

Until October...

From Data Breaches to Ransomware: How to Avoid Becoming the Victim of a Cybercrime

Each time you connect to the Internet, you risk becoming the victim of a cybercrime. It's the price we pay for living in a digital world — whether it's at home, at work, or on your smartphone.

According to the Identity Theft Resource Institute, the number of U.S. data breaches in 2016 increased by 40%. And as recently as May 2017, a widespread "ransomware" attack targeted personal computers across the globe. While software companies are continually developing strategies to combat the latest cybercrimes, there are some steps you can take to help protect yourself online.

The stronger, the better

It's a scary thought — most of us have a large amount of financial and personal information that's readily accessible through the Internet, in most cases protected by nothing more than a username and password.

Create a strong password by using a combination of lower- and upper-case letters, numbers, and symbols or by using a random phrase. Avoid using a password with your personal information such as your name and address. In addition, have a separate and unique password for each account or website that you use.

If you have trouble keeping track of all your password information or you want an extra level of password protection, consider using password management software. Password manager programs generate strong, unique passwords that you control through a single master password.

Follow the 3-2-1 rule

Backing up your online data is critical to avoid losing valuable information due to a cyber attack. If you have digital assets that you don't want to risk losing forever, you should back

them up regularly. This pertains to data stored on both personal computers and mobile devices.

When backing up data, a good rule to follow is the 3-2-1 rule. This rule helps reduce the risk that any one event — such as a computer hacker gaining access to your computer — will compromise your primary data and backups. In order to follow the 3-2-1 rule:

- Have at least three copies of your data (this means a minimum of the original plus two backups)
- Use at least two different formats (e.g., hard drive and cloud-based service)
- Ensure that at least one backup copy is stored in a separate location (e.g., safe-deposit box)

Stay one step ahead

Finally, the best way to avoid becoming the victim of a cybercrime is to stay one step ahead of the cybercriminals. Here are some extra precautions you can take before you go online:

Consider using two-step authentication.

Two-step authentication, which involves using a text or email code along with your password, provides another layer of protection for your sensitive data.

Keep an eye on your accounts. Notify your financial institution immediately if you see suspicious activity. Early notification not only can stop the cyber thief but may limit your financial liability.

Think twice before clicking. Beware of emails containing links or asking for personal information. Never click on a link in an email or text unless you know the sender and have a clear idea where the link will take you.

Be careful when you shop. When shopping online, look for the secure lock symbol in the address bar and the letters *https*: (as opposed to *http*:) in the URL. Avoid using public Wi-Fi networks for shopping, as they lack secure connections.

Five Common Financial Aid Myths

Net price calculators

Net price calculators, available on all college websites, provide families with an advance estimate of what their "net" price will be at a particular college based on their income, assets, and personal family information. The net price is the price after grants and scholarships are factored in. This figure gives families a much better idea of the real cost of a particular college so they can make well-informed financial decisions.

With some private colleges now crossing the once unthinkable \$70,000-per-year mark in the 2017/2018 school year, and higher costs at public colleges, too, financial aid is essential for many families. How much do you know about this important piece of the college financing puzzle? Consider these financial aid myths.

1. My child won't qualify for aid because we make too much money

Not necessarily. While it's true that family income is the main factor in determining aid eligibility, it's not the only factor. The number of children you'll have in college at the same time is a significant factor — for example, having two children in college will cut your expected family contribution (EFC) in half. Your assets, overall family size, and age of the older parent also play into the equation.

Side note: Even if you think your child won't qualify for aid, you should still consider filing the government's Free Application for Federal Student Aid (FAFSA) for two reasons. First, all students — regardless of income — who attend school at least half-time are eligible for unsubsidized federal Direct Loans, and the FAFSA is a prerequisite for these loans. ("Unsubsidized" means the student pays the interest during college, the grace period, and any loan deferment periods.) So if you want your child to have some "skin in the game" by taking on a small student loan, you'll need to file the FAFSA. Second, the FAFSA is *always* a prerequisite for college need-based aid and is *sometimes* a prerequisite for college merit-based aid. Bottom line? It's usually a good idea to file this form.

2. The form is too hard to fill out

Not really. Years ago, the FAFSA was cumbersome to fill out. But now that it's online at fafsa.ed.gov, it is much easier to complete. The online version has detailed instructions and guides you step by step. There is also a toll-free number you can call with questions: 1-800-4-FED-AID. All advice is free. In addition, a recent change has made the FAFSA even easier to fill out: The FAFSA now relies on your tax information from two years prior rather than one year prior (referred to as the "prior-prior year" or the "base year"). For example, the 2017/2018 FAFSA relies on your 2015 tax information, the 2018/2019 FAFSA relies on your 2016 tax information, and so on. This means that your necessary tax numbers will be handy as you answer questions on the FAFSA. The first time you file the FAFSA, you and your child will need to create an FSA ID, which consists of a username and password.

Side note: The CSS/Financial Aid PROFILE, an additional aid form required by most private colleges, is more detailed than the FAFSA and thus harder to fill out. It essentially takes a financial snapshot of your family's past year, current year, and upcoming year (it asks for estimates for the latter).

3. If my child applies to a more expensive school, we'll get more aid

Not necessarily. Colleges determine your EFC based on the income and asset information you provide on the FAFSA and, where applicable, the CSS PROFILE. Your EFC stays the same no matter what college your child applies to. The difference between the cost of a particular college and your EFC equals your child's financial need (sometimes referred to as "demonstrated need"). The more expensive a college is, the greater your child's financial need. But a greater financial need doesn't automatically translate into a bigger financial aid package — colleges aren't obligated to meet 100% of your child's financial need.

Side note: When making a college list, your child can research a particular college's generosity, including whether it meets 100% of demonstrated need and if it replaces federal loan awards with college grants in its aid packages.

4. We own our home, so my child won't qualify for aid

The FAFSA does not take home equity into account when determining a family's expected family contribution (it also does not consider the value of retirement accounts, cash value life insurance, and annuities).

Side note: The CSS PROFILE does collect home equity and vacation home information, and some colleges may use it when distributing their own institutional aid.

5. I lost my job after I submitted aid forms, but there's nothing I can do now

Not true. If your financial circumstances change after you file the FAFSA — and you can support this with documentation — you can politely ask the financial aid officer at your child's school to revisit your aid package; the officer has the authority to make adjustments if there have been material changes to your family's income or assets.

Side note: A blanket statement of "I can't afford my family contribution" is unlikely to be successful unless it is accompanied by a significant changed circumstance that affects your ability to pay.

Does Your Business Need a Buy-Sell Agreement?

The cost and availability of life insurance depend on factors such as age, health, and the type and amount of insurance purchased. As with most financial decisions, there are expenses associated with the purchase of life insurance. Policies commonly have mortality and expense charges. In addition, if a policy is surrendered prematurely, there may be surrender charges and income tax implications.

An individual disability income policy could help replace a percentage of your income (up to the policy limits) if you're unable to work as a result of an illness or injury. The policy will stay in force, regardless of your employment situation, as long as you pay the premiums.

When you're mired deep in the day-to-day challenges of the management of your business, it's often hard to step out of the trees and take a good hard look at the forest. But at various points in the business cycle, it's important to do just that. For example, one of the key decisions you'll need to consider is what would happen to your business if you decide to step away, or you die or become permanently disabled. A buy-sell agreement can be a useful tool in helping you plan for these circumstances.

What is a buy-sell agreement?

A buy-sell agreement is a legally binding agreement that establishes when, to whom, and at what price you can sell your interest in a business. Buy-sell agreements are also known as business continuation agreements and buyout agreements.

You can create a buy-sell as a separate agreement or you can include certain provisions addressing the buy-sell issues in a business's operating agreement. Regardless, the agreement or provisions must clearly identify the potential buyer, any restrictions and limitations, and the conditions under which a sale will occur. Under the terms of the agreement, you and the buyer enter into a contract for the transfer of your business interest by you (or your estate) at the time of a specified triggering event. Typical triggering events include death, long-term disability, retirement, divorce, personal insolvency or bankruptcy, criminal conviction, loss of professional license, and resignation or termination of employment.

A well-crafted buy-sell agreement creates a market for your business interest, establishes its price, and provides cash to complete the business purchase. The ability to fix the purchase price as the taxable value of your business makes a buy-sell agreement especially useful in estate planning. That's because if death is the triggering event, it can help reduce the estate tax burden on your heirs. Additionally, because funding for a buy-sell agreement is typically arranged when the agreement is executed, you're able to ensure that funds will be available when needed, providing your estate with liquidity that may be needed for expenses and taxes.

Pricing the company and funding a buy-sell agreement

A buy-sell should establish a formula for determining the purchase price or state the price outright. Without establishing this price in advance, lengthy disputes and lawsuits can

arise at the time the ownership interest must be bought back. When the buy-sell involves family members, it must also be proven that the transaction is comparable to an arms-length sale between unrelated people and was entered into for a bona fide business purpose.

After determining the value of the business, you, your advisors, and other parties to the agreement will determine the best way to fund the transaction and the triggers appropriate for your business situation. There are many different ways to fund a buy-sell agreement, including a sinking fund, cash, borrowed funds, installment sale, self-canceling installment note, private annuity, life insurance, and disability insurance. Depending on the situation, one or more of the possible methods may be used.

Types of structures

Buy-sell agreements can be structured to meet the needs of both the business and its owner(s), taking into consideration tax consequences and individual goals. Following are three types of buy-sell agreements, along with brief descriptions of each:

- An **entity purchase (or redemption) buy-sell** obligates the business to buy the interests of the departing owner(s).
- With a **cross-purchase buy-sell**, each owner agrees to buy a share of the departing owner's interest. The business is not a party to the transaction.
- A **wait-and-see buy-sell** is used when the parties are unsure whether the business or the owners will buy the business interest. Typically, the business is given the first option, and if it is not exercised, the remaining owners are given the opportunity. If the remaining owners do not wish to buy, the business must purchase the interest.

Other considerations

Keep in mind that there are costs and possible disadvantages involved in establishing a buy-sell agreement. One such disadvantage is that the agreement typically limits your freedom to sell the business to outside parties.

If you think that a buy-sell agreement might benefit you and your business, consult your attorney, accountant, and financial professional.

Is the Social Security Administration still mailing Social Security Statements?

Your Social Security Statement provides important information about your Social Security record and future benefits. For several years, the Social Security Administration (SSA) mailed these statements every five years to people starting at age 25, but due to budgetary concerns, the SSA has stopped mailing Social Security Statements to individuals under age 60.

Workers age 60 and over who aren't receiving Social Security benefits will still receive paper statements in the mail, unless they opt to sign up for online statements instead. If you're age 60 or older, you should receive your statement every year, about three months before your birthday. The SSA will mail statements upon request to individuals under age 60.

However, the quickest way to get a copy of your Social Security Statement is to sign up for a *my* Social Security account at the SSA website, ssa.gov. Once you've signed

up, you'll have immediate access to your statement, which you can view, download, or print. Statement information generally includes a projection of your retirement benefits at age 62, at full retirement age (66 to 67), and at age 70; projections of disability and survivor benefits; a detailed record of your earnings; and other information about the Social Security program.

The SSA has recently begun using a two-step identification method to help protect *my* Social Security accounts from unauthorized use and potential identity fraud. If you've never registered for an online account or haven't attempted to log in to yours since this change, you will be prompted to add either your cell phone or email address as a second identification method. Every time you enter your account username and password, you will then be prompted to request a unique security code via the identification method you've chosen, and you need to enter that code to complete the log-in process.

I just bought a vacation home. Do I need to purchase a specific type of insurance?

Insuring a vacation home is different from insuring a primary residence. As a result, you'll want to purchase insurance that is specifically geared to this type of property.

The cost to insure a vacation home will vary, depending on where the property is located and the insurance company. Other factors, such as the type of property and special amenities, may also affect the cost of premiums.

Insurance that is specifically designed for second/vacation homes can range from standard coverage that protects against certain named perils, to more comprehensive coverage that protects against all perils (up to policy limits), unless specifically excluded in the policy.

Depending on what the policy covers, you may need to obtain additional protection (e.g., personal and liability property coverage) through either an endorsement to your primary homeowners policy or a separate policy. And if your vacation home is located in an area that is susceptible to flood damage, which is not

covered under standard homeowners insurance, you'll want to consider separate coverage for that peril as well. Homes susceptible to hurricanes, wildfires, or earthquakes might also require an endorsement or separate policy.

Insurance premiums for vacation homes are usually much higher than those for a primary residence because of circumstances unique to second homes (e.g., long periods of being unoccupied, vandalism risk). However, you may be able to save money by insuring your vacation home with the same company that provides coverage for your primary residence. You might also be eligible for other discounts, such as those offered for newly built homes and those with an operating security system. Policy discounts vary by state and insurer.

Be sure to shop around for the best coverage and rates. You might also want to contact the state department of insurance where your vacation home is located for additional information on the coverage and rate options that may be available.
