This analysis must be reviewed in conjunction with the limitations and conditions disclosed in the Disclaimer page. Projections are based on assumptions provided by the advisor/representative, and are not guaranteed. Actual results will vary, perhaps to a significant degree. The projected reports are hypothetical in nature and for illustrative purposes only. Return assumptions do not reflect the deduction of any commissions, or fees or product charges that may apply to any particular investment. Deduction of such charges would result in a lower rate of return. Consult your tax and/or legal advisor before implementing any tax or legal strategies. Past performance is no guarantee of future results. The market for all securities is subject to fluctuation such that upon sale an investor may lose principal.

Disclaimer

The following report is a diagnostic tool intended to review your current financial situation and suggest potential planning ideas and concepts that may be of benefit. The purpose of the report is to illustrate how accepted financial and estate planning principles may improve your current situation.

This report is based upon information and assumptions provided by you (the client). This report provides broad and general guidelines on the advantages of certain financial planning concepts and does not constitute a recommendation of any particular technique. We recommend that you review your plan annually, unless changes in your personal or financial circumstances require more frequent review.

The term "plan" or "planning," when used within this report, does not imply that a recommendation has been made to implement one or more financial plans or make a particular investment. Nor does the plan or report provide legal, accounting, financial, tax or other advice. Rather, the report and the illustrations therein provide a summary of certain potential financial strategies. The reports provide projections based on various assumptions and are therefore hypothetical in nature and not guarantees of investment returns. You should consult your tax and/or legal advisors before implementing any transactions and/or strategies concerning your finances.

Additionally, this report may not reflect all holdings or transactions, their costs, or proceeds received by you. Prices that may be indicated in this report are obtained from sources we consider reliable but are not guaranteed. Past performance is no guarantee of future performance and it is important to realize that actual results may differ from the projections contained in this report. The presentation of investment returns set forth in this report do not reflect the deduction of any commissions or fees or product charges that may apply to any particular investment. Deduction of such charges will result in a lower rate of return as compared to that set forth in this report.

The information contained in this report is not written or intended as financial, tax or legal advice. The information provided herein may not be relied on for purposes of avoiding any federal tax penalties. You are encouraged to seek financial, tax and legal advice from your professional advisors.

This report may be provided as part of a financial plan being offered either through LPL Financial or a third-party registered investment advisor. Please refer to the financial planning agreement you signed for further information about the parties providing services.

This report may or may not contain general or specific recommendations for implementation. Please understand that you are under no obligation to implement any recommendations that may be included within this report or the financial plan; however, if you choose to, you may implement through a financial advisor associated with LPL Financial. You may decide to implement through the purchase or sale of one or more securities or insurance products on a commission basis or through asset management services in an investment advisory relationship for an ongoing fee. Please refer to the client agreement and any disclosure documents related to any implementation services you choose for further information.

LPL Financial representatives offer access to Trust Services through The Private Trust Company N.A., an affiliate of LPL Financial.

Investors should consider the investment objectives, risks, charges, and expenses of the investment company carefully before investing. The prospectus contains this and other information about the investment company. You can obtain a prospectus from your financial representative. Read carefully before investing.

I/We have received and read this Disclaimer page and understand its contents and, therefore, the limitations of the report. Furthermore, I understand that none of the calculations and presentations of investment returns are guaranteed.

This analysis must be reviewed in conjunction with the limitations and conditions disclosed in the Disclaimer page. Projections are based on assumptions provided by the advisor/representative, and are not guaranteed. Actual results will vary, perhaps to a significant degree. The projected reports are hypothetical in nature and for illustrative purposes only. Return assumptions do not reflect the deduction of any commissions, or fees or product charges that may apply to any particular investment. Deduction of such charges would result in a lower rate of return. Consult your tax and/or legal advisor before implementing any tax or legal strategies. Past performance is no guarantee of future results. The market for all securities is subject to fluctuation such that upon sale an investor may lose principal.

Mean: Simple average, equal to the sum of all values divided by the number of values.

Rate of Return: The average annual return for the number of years shown.

Standard Deviation: A statistical measure of the volatility based on the distribution of a set of data from its mean (average value). Example: a portfolio with an average return of 10% and a standard deviation of 15% would have a 95% probability (twice the standard deviation) of having a return somewhere between -20% and 40%. Generally, more aggressive portfolios have a higher standard deviation and more conservative portfolios have a lower standard deviation.

By investing in a 529 plan outside of the state in which you pay taxes, you may lose tax benefits offered by the state's plan. Withdrawals used for qualified expenses are federally tax-free. Tax treatment at the state level may vary.

Unless certain criteria is met, Roth IRA owners must be 59 1/2 or older and have held the IRA for 5 years before tax-free withdrawals are permitted.

Variables Annuities are long-term investment vehicles designed for retirement purposes and contain both an investment and insurance component. They are sold by prospectus. Guarantees are based on the claims paying ability of the issuing company. Withdrawals made prior to 59 1/2 are subject to 10% IRS penalty tax and surrender charges may apply. Gains from tax-deferred investments are taxable as ordinary income upon withdrawal. The investment returns and principal value of the available sub-accounts may fluctuate in value. When redeemed the value of the account may be worth more or less than the original value.

Life insurance policies are subject to substantial fees and charges. Investment portfolios are subject to market risk. Death benefit guarantees are subject to the claims-paying ability of the issuing life insurance company. Loans will reduce the policy's death benefit and cash surrender value, and have tax consequences if the policy lapses.

HFR Equity Hedge Index – Equity Hedge, also known as long/short equity, combines core long holdings of equities with short sales of stock or stock index options. Equity hedge portfolios may be anywhere from net long to net short depending on market conditions. Equity hedge managers generally increase net long exposure in bull markets and decrease net long exposure or even are net short in a bear market. Generally, the short exposure is intended to generate an ongoing positive return in addition to acting as a hedge against a general stock market decline. Stock index put options are also often used as a hedge against market risk. Profits are made when long positions appreciate and stocks sold short depreciate. Conversely, losses are incurred when long positions depreciate and/or the value of stocks sold short appreciates. Equity hedge managers' source of return is similar to that of traditional stock pickers on the upside, but they use short selling and hedging to attempt to outperform the market on the downside.

International Indexes

MSCI EAFE Index - Morgan Stanley Capital International's market capitalization weighted index composed of companies representative of the market structure of 20 developed market countries in Europe, Australasia and the Far East. Countries include:
