The average market capitalization of the strategy gives you a measure of the size of the companies in the strategy. Dividend yield refers to the stock's annual dividend payments to shareholders, expressed as a percentage of the stock's current price. The price-to-earnings ratio (P/E Ratio) is the ratio for valuing a company that measures its current share price relative to its per-share earnings (EPS). The price to book ratio compares a company's market value to its book value.

## Strategy Sector Comparison

Past performance is no guarantee of future results and investing has risks. The information is subject to change without notice. This strategy is available by subscription as well. Holdings are subject to change at any time because of screening. If a holding fails, it will be replaced by the next largest company that passes the screening and is not currently part of the portfolio. This portfolio as shown does not have a cash position. In practice, the portfolio usually does hold some cash depending on the client's needs. All investments involve risk, including loss of principal.
