

The Trump Rally Extends to Sixth Week

March 6, 2017 - U.S. stocks posted modest gains on Friday, resulting in a sixth weekly advance. The bulk of equity gains came on Wednesday, following President Trump’s well-received Tuesday evening address to a joint session of Congress. While announcing plans to invest \$1 trillion in infrastructure spending over 10-years, the president’s spending plans were short on details, but his speech marked a calmer, more presidential tone, full of optimism and pleas for cross-party cooperation. The Dow Industrials jumped 303 points on Wednesday, finishing above 21,000 for the first time, taking just 24 trading days since reaching 20,000 on January 25th.

Key economic data was plentiful and mostly positive last week. Durable goods orders rebounded 1.8% in January after December’s revised 0.8% decline, while January pending home sales unexpectedly fell 2.8%. The second of three estimates for U.S. fourth quarter GDP growth was unchanged at 1.9%, missing forecasts for 2.1%. A report from Case-Shiller showed home prices climbed 5.4% YoY through December, topping forecasts, while the Conference Board’s consumer sentiment index increased to 114.8, the highest level since July 2001. Meanwhile, construction spending fell 1% in January, for its first pullback since September. Lastly, the ISM manufacturing PMI expanded at the fastest pace since August 2014. Backed by the biggest gain in order backlogs in four years, the February PMI manufacturing activity index increased from 56 to 57.7, representing its sixth straight monthly advance.

For the week, including some profit-taking on Thursday, the S&P 500 climbed by 0.71%, the Dow Industrials gained 0.88%, and the NASDAQ Composite rose 0.46%. Seven of the 11 major U.S. sector groups finished higher last week, led by Financials (+2.08%), Energy (+1.45%) and Healthcare (+1.36%). Telecom (-1.07%) and Real Estate (-0.70%) fell the most, giving back around half of their prior week’s gains. Federal Reserve Chair Janet Yellen capped the week of hawkish commentary from several Fed members, saying she supports a mid-March rate hike if economic progress continues. The U.S. Dollar Index strengthened by 0.04% last week, ending at 101.54. Treasuries eased in price over the week, boosting the yield on 10-year Treasury notes by 16.6 basis points to 2.479%.

Chart of the Week: Global Inflation at Two-Year High

Chart 1:

Global consumer prices

Source: J.P. Morgan

As shown in Chart 1 above, the Eurozone's preliminary February all-industry composite activity Purchasing Managers Index (PMI) from IHS Markit jumped to a near six-year (70 month) high of 56.0, suggesting the pace of the growth across the European Union improved markedly.

Indeed, the increase was broad-based across countries and components. According to J.P. Morgan, the PMI reading would be consistent with about 2.5% annualized GDP growth. The firm is cautious about placing significant weight on one month's reading, but the increase was large enough (and supported by national surveys) to prompt an upward revision to their first-half 2017 growth outlook. Their revised forecast has growth at 2.25% in the first quarter and 2% expected for the second quarter.

Furthermore, average GDP growth in the euro-region of 1.8% has delivered a 0.8% average annual decline in the unemployment rate in recent years. Absent a revival of productivity growth, the unemployment rate could fall even faster in 2017. This would pressure the European Central Bank (ECB), given that the unemployment rate of 9.6% is not far from the ECB's 8.5% full employment target estimate. These macro considerations have driven J.P. Morgan to forecast an ECB tapering in their bond-buying program at the start of next year (2018) and a rate hike in second-half of 2018.

The return and principal value of bonds fluctuate with changes in market conditions. If bonds are not held to maturity, they may be worth more or less than their original value.

The yield on high yield bonds is due, in part, to the volatility and risk of the high securities market. High yield bonds are also known as “junk bonds”.

Additional risks are associated with international investing, such as currency fluctuations, political and economic instability, and differences in accounting standards.

Affiliates and subsidiaries and/or officers and employees of Cetera Financial Group or Cetera firms may from time to time acquire, hold or sell a position in the securities mentioned herein.

While diversification may help reduce volatility and risk, it does not guarantee future performance.

Glossary

The **Bloomberg Barclays US Aggregate Bond Index**, which was originally called the Lehman Aggregate Bond Index, is a broad based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate debt securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency) debt securities that are rated at least Baa3 by Moody's and BBB- by S&P. Taxable municipals, including Build America bonds and a small amount of foreign bonds traded in U.S. markets are also included. Eligible bonds must have at least one year until final maturity, but in practice the index holdings has a fluctuating average life of around 8.25 years. This total return index, created in 1986 with history backfilled to January 1, 1976, is unhedged and rebalances monthly

The **Bloomberg Barclays US Corporate High Yield Index** measures the USD-denominated, non-investment grade, fixed-rate, taxable corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below, excluding emerging market debt. Payment-in-kind and bonds with predetermined step-up coupon provisions are also included. Eligible securities must have at least one year until final maturity, but in practice the index holdings has a fluctuating average life of around 6.3 years. This total return unhedged index was created in 1986, with history backfilled to July 1, 1983 and rebalances monthly.

The **Bloomberg Barclays US Municipal Bond Index** covers the USD-denominated long-term tax exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds. Many of the subindices of the Municipal Index have historical data to January 1980. In addition, several subindices based on maturity and revenue source have been created, some with inception dates after January 1980, but no later than July 1, 1993. Eligible securities must be rated investment grade (Baa3/BBB- or higher) by Moody's and S&P and have at least one year until final maturity, but in practice the index holdings has a fluctuating average life of around 12.8 years. This total return index is unhedged and rebalances monthly

The **Bloomberg Commodity Index** is a broadly diversified index that measures 22 exchange-traded futures on physical commodities in five groups (energy, agriculture, industrial metals, precious metals, and livestock), which are weighted to account for economic significance and market liquidity. No single commodity can comprise less than 2% or more than 15% of the index; and no group can represent more than 33% of the index. However, between rebalancings, group weightings may fluctuate to levels outside the limits. The index rebalances annually, weighted 2/3 by trading volume and 1/3 by world production.

The **CBOE Volatility Index® (VIX®)** is a key measure of market expectations of near-term volatility conveyed by S&P 500 stock index option prices.

The **Dow Jones Industrial Average** is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and the NASDAQ.

The **Hang Seng Index** is a market capitalization weighted index of the stocks of the 33 largest companies in the Hong Kong market. The Hang Seng Index is a price weighted/share price index which measures movements in the prices of shares, but not of their dividends.

The **MSCI EAFE Index** is designed to measure the equity market performance of developed markets (Europe, Australasia, Far East) excluding the U.S. and Canada. The Index is market-capitalization weighted.

The **MSCI Emerging Markets Index** is designed to measure equity market performance in global emerging markets. It is a float-adjusted market capitalization index.

The **NASDAQ Composite Index** includes all domestic and international based common type stocks listed on The NASDAQ Stock Market. The NASDAQ Composite Index is a broad based index

The **Nikkei 225 Stock Average** is a price-weighted average of 225 top-rated Japanese companies listed in the First Section of the Tokyo Stock Exchange. The constituents are changed at the beginning of October every year based on an annual review by Nikkei, Inc. The Nikkei average was first published on May 16, 1949, where the average price was ¥176.21 with a divisor of 22.5

The **Russell 2000 Index** measures the performance of the small-cap segment of the U.S. equity universe and is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership.

The **Russell 3000 Index** measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market.

The **Russell Midcap Index** measures the performance of the mid-cap segment of the U.S. equity universe and is a subset of the Russell 1000 Index. It includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap represents approximately 31% of the total market capitalization of the Russell 1000 companies.

The **S&P 500** is an index of 500 stocks chosen for market size, liquidity and industry grouping (among other factors) designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe.

The **S&P GSCI Crude Oil Index** is a sub-index of the S&P GSCI, provides investors with a reliable and publicly available benchmark for investment performance in the crude oil market.

The **S&P GSCI Gold Index**, a sub-index of the S&P GSCI, provides investors with a reliable and publicly available benchmark tracking the COMEX gold futures market.

The **Shanghai Composite Index** is a stock market index of all stocks (A shares and B shares) that are traded at the Shanghai Stock Exchange

The **STOXX Europe 600 Index** is derived from the STOXX Europe Total Market Index (TMI) and is a subset of the STOXX Global 1800 Index. With a fixed number of 600 components, the STOXX Europe 600 Index represents large, mid and small capitalization companies across 18 countries of the European region: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom

West Texas Intermediate (WTI) is a crude oil stream produced in Texas and southern Oklahoma which serves as a reference or "marker" for pricing a number of other crude streams. WTI is the underlying commodity of the New York Mercantile Exchange's oil futures contracts

The **U.S. Dollar Index** is a weighted geometric mean that provides a value measure of the United States dollar relative to a basket of major foreign currencies. The index, often carrying a USDX or DXY moniker, started in March 1973, beginning with a value of the U.S. Dollar Index at 100.000. It has since reached a February 1985 high of 164.720, and has been as low as 70.698 in March 2008
