What Dreams May Come

Abraham Lincoln had many vivid dreams that he shared with his friends. In April of 1865, he told a few companions of a particularly powerful one from the night before.

Lincoln heard sobs, as if many people were weeping. In his dream, he left his bed and walked through the White House. The halls were empty, but he could still hear the same mournful sounds of distress.

I was puzzled and alarmed. What could be the meaning of all this? Determined to find the cause of a state of things so mysterious and so shocking, I kept on until I arrived at the East Room, which I entered.

There I met with a sickening surprise. Before me was a catafalque, on which rested a corpse wrapped in funeral vestments. Around it were stationed soldiers who were acting as guards; and there was a throng of people, gazing mournfully upon the corpse, whose face was covered, others weeping pitifully.

"Who is dead in the White House?" I demanded of one of the soldiers, "The president," was his answer; "he was killed by an assassin."

Three days later, Lincoln was shot by John Wilkes Booth. On Easter Sunday, he lay in state in the East Room, on a catafalque surrounded by soldiers.

"Although it was only a dream, I have been strangely annoyed by it ever since."

Lincoln presided over a cabinet meeting on the last day of his life. There he gave Treasury Secretary Hugh McCulloch approval to form a new government agency to fight counterfeiting. So it was that one of the last acts of the soon to be assassinated president was to approve the establishment of the Secret Service. It would be another thirty-six years before the service was formally given the job of protecting presidents.

The Greatest Presidential Stories Never Told By Rick Beyer

Weekly Market Commentary September 14, 2020

The Markets

Last week, the Nasdaq Composite Index set another record.

So far, 2020 has been memorable for many reasons, not the least of which is the incredible speed at which some events have been occurring in financial markets. This year, we've experienced:

- The end of the longest U.S. stock bull market in history
- A global stock market crash
- The shortest U.S. stock bear market in history
- Multiple record highs for major U.S. stock indices

Last week, we witnessed the swiftest correction on record as the Nasdaq fell by 10 percent in just three days. By the end of the week, the Index had recouped some losses and finished down 4.1 percent. The Standard & Poor's 500 Index and Dow Jones Industrial Average also finished the week lower.

It would be gratifying if the recent drop in share price steadied U.S. stock markets. However, we are likely to see stocks remain volatile through the end of 2020. *The Economist* explained:

"Because of the influential role of turbocharged retail investment, prices can be expected to remain choppy. Moreover, the market is entering a period where typical COVID-19-related volatility may be exacerbated by

the twists and turns of America's presidential election.

"That said, much of the tech recovery from the lows in March was rooted in fundamental shifts, like policy interventions, or pandemic-prompted changes to consumer behavior, such as online shopping, that have helped firms...Even if the giddy obsession with tech firms exhibited during the summer fades, there may be little reason for investors to throw in the beach towel yet."

This is a good time to take a gut check and make sure your asset allocation aligns with your financial goals and your response to market volatility.

Data as of 9/11/20	1-Week	Y-T-D	1-Year	3-Year	5-Year	10-Year
Standard & Poor's 500 (Domestic Stocks)	-2.6%	3.4%	11.3%	10.3%	11.2%	11.5%
Dow Jones Global ex-U.S.	0.2	-5.0	2.7	-0.5	3.7	2.2
10-year Treasury Note (Yield Only)	0.7	NA	1.7	2.1	2.2	2.7
Gold (per ounce)	1.1	27.9	30.6	13.4	11.7	4.6
Bloomberg Commodity Index	-1.2	-11.5	-8.5	-5.5	-4.3	-6.3

Dow Jones Global ex-US, Gold, Bloomberg Commodity Index returns exclude reinvested dividends (gold does not pay a dividend) and the three-, five-, and 10-year returns are annualized; and the 10-year Treasury Note is simply the yield at the close of the day on each of the historical time periods.

GO FLY A KITE. Wind is one of the fastest growing energy sources in the United States. In 2019, wind generated 7.2 percent of the nation's electricity, powering 27.5 million homes, reported the *American Wind Energy Association*. Wind power has become a major provider of electricity in:

- Iowa generating 41.9 percent of electricity
- Kansas generating 41.4 percent of electricity
- Oklahoma generating 34.5 percent of electricity
- North Dakota generating 26.8 percent of electricity
- South Dakota generating 23.9 percent of electricity
- Maine generating 23.6 percent of electricity

As with many things, wind farms have pros and cons. On the plus side, wind energy is a renewable energy source that generates income and tax revenue in rural areas. In the negative column, construction can damage drainage systems and hurt crop production. In addition, towering turbines can catch fire, throw ice, cause headaches (literally), and create other issues, reported *Slate*.

A new wind energy option may do away with some of those negatives in some locations. Wind kites deliver power and have a far smaller profile than many turbines. *Fast Company* explained:

"As the kite flies autonomously, driven by the wind, eight small onboard rotors turn and generate energy that is sent down a thin tether back to the

ground...it does the same work as the tips of the blades on large wind turbines, which convert the most energy in the system because they move the greatest distance as they're pushed by the wind. But the new technology, which came out of research at the Technical University of Munich, does that work without the same need for massive infrastructure."

Wind kites may be well-suited to islands and other areas where importing turbines is not feasible. They may also be a sound option in hurricane-prone regions since kites can be lowered to the ground. Best of all, kites use 10 times less material, so costs are significantly reduced.

Weekly Focus - Think About It

"We are moving so fast that when plans are being made to perform some great feat, these plans are broken into by a youth who enters and says, "I have done it." This is exactly what Cook did for Arctic exploration." (April 1914)
