WILL A RECESSION ROB YOUR RETIREMENT?

FOUR THINGS TO CHECK NOW

When a recession hits, much more is at stake than stock market shares. During The Great Recession, December 2007 through June 2009, not only did Americans lose \$16 trillion in net worth,¹ unemployment increased by 4.5 percentage points² and over 8.7 million jobs were lost.³ In the midst of the COVID-19 recession, which began in February 2020, the Federal Reserve projected that the U.S. economy would shrink 6.5% in 2020 before rebounding with a 5% gain in 2021.⁴

So, when economists start pointing to signs of a recession⁵, it is natural to feel anxious. Retirees on a fixed income or those getting ready to begin retirement can feel especially vulnerable.

HERE'S THE GOOD NEWS:

While the economy is largely unpredictable, your retirement income doesn't have to be. By getting a clear picture of where your finances stand and creating a plan that takes worst-case scenarios into account, you can feel confident about retirement — even in a recession.

This guide will look at four areas to address to help ensure you can weather a drop in the market.

1. YOUR EXPENSES

Whether in a prosperous bull market or declining bear market, the list of things to prepare for in retirement is lengthy: rising health care costs,⁶ end-of-life expenses and a longer life⁷ often top the list.

Any financial professional will tell you that the earlier you can save, the better. But, as many families realize, sometimes building a nest egg takes a back seat to things like buying a home, paying for college or recovering from a job loss due to the global pandemic. In fact, in 2018, a survey by the Federal Reserve found that one-quarter of nonretired adults surveyed had no retirement savings, period.⁸ The financial repercussions from the COVID-19 pandemic will continue to evolve, heightening concerns for Americans' future economic well-being.⁹

⁶ Fidelity Viewpoints. Aug. 3, 2020. "How to plan for rising health care costs." <https://www.fidelity.com/viewpoints/personal-finance/plan-for-rising-health-care-costs>. Accessed Sept. 1, 2020.

⁷ U.S. Census Bureau. June 25, 2020. "65 and Older Population Grows Rapidly as Baby Boomers Age." <https://www.census.gov/newsroom/press-releases/2020/65-older-population-grows.html>. Accessed Sept. 1, 2020.

⁸ The Board of Governors of the Federal Reserve System. May 2019. "Report on the Economic Well-Being of U.S. Households in 2018." <https://www.federalreserve.gov/consumerscommunities/files/2018-report-economic-well-being-us-households-201905.pdf>. Accessed Sept. 1, 2020.

⁹ Board of Governors of the Federal Reserve System. May 2020. "Report on the Economic Well-Being of U.S. Households in 2019, Featuring Supplemental Data from April 2020." <https://www.federalreserve.gov/publications/files/2019-report-economic-well-being-us-households-202005.pdf>. Accessed Sept. 1, 2020.

What about you? Recessions often lead to job cuts. If you had to stop working earlier than planned, would you be in a tight spot?

CHECK

YOUR CURRENT AND FUTURE EXPENSES

Calculate what you spent last month on:

Mortgage/rent: _____
Home/rental insurance: _____
Utilities (water, electricity, gas): _____
Auto (payments, insurance, fuel): _____
Food (groceries and dining out): _____
Other: _____

TOTAL: _____

Based on a recent study, a 65-year-old couple retiring in 2020 can anticipate spending on average \$295,000 in health care and medical expenses throughout their retirement, excluding long-term care. (That would be approximately \$983 per month over a 25-year retirement or \$1,229 per month over a 20-year retirement.) You may also wish to factor in health care expenses that could arise at the end of your retirement years.¹⁰ Add an amount that you feel reflects how much you can anticipate spending per month on health care.

HEALTH CARE TOTAL: _____

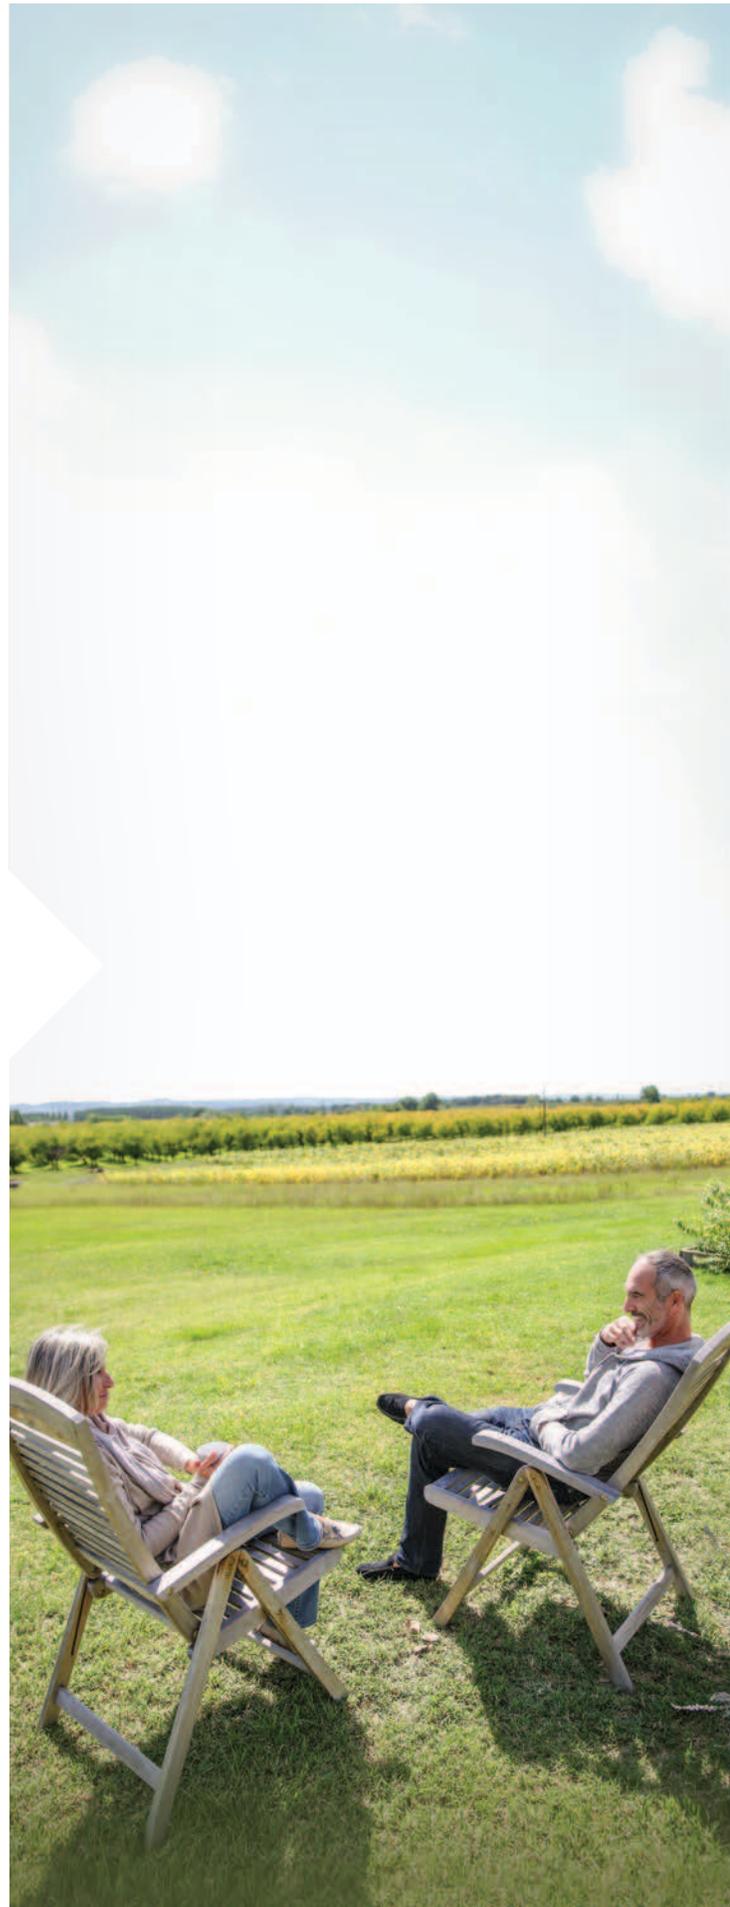

Add these two totals together and multiply by 12 to get your approximate annual expenses in retirement.

ANNUAL TOTAL: _____

Of course, these expenses don't include the things you may *want* to do in retirement, things like traveling, hobbies and family visits. These things not only make life more fulfilling, research also shows participating in the activities you enjoy is good for your health.¹¹ So, as you consider your expenses, remember to take your dreams into account.

¹⁰ Fidelity Viewpoints. Aug. 3, 2020. "How to plan for rising health care costs." <https://www.fidelity.com/viewpoints/personal-finance/plan-for-rising-health-care-costs>. Accessed Sept. 1, 2020.

¹¹ Kaiser Permanente. Thrive. Aug. 22, 2019. "The health benefits of doing what you love." <https://thrive.kaiserpermanente.org/thrive-together/live-well/health-benefits-of-doing-what-you-love>. Accessed Sept. 1, 2020.

2

2. YOUR ASSETS

Where does your nest egg live? If you're like many, your assets are spread out in things like 401(k)s, mutual funds and company stock options. All of those assets are tied to the market, so, during a recession, they could significantly decrease in value. On average, the stock market loses 13% in a correction and 32.5% in a bear market.¹²

CHECK

THE ASSETS YOU'VE ACCUMULATED

Take inventory of your accounts:

Employer benefit plan (401(k),
pension, 403(b), etc.): _____

IRA: _____

Stock options: _____

Mutual funds: _____

Bonds: _____

Other: _____

TOTAL: _____

Now consider the expenses you calculated in Section 1. Would you have enough income to meet those expenses if you lost your job? Could you support your lifestyle if you and your spouse lived to age 80, 90 or beyond? (According to the Social Security Administration, the average 65-year-old man can expect to live to age 84, and the average 65-year-old woman can expect to live to age 86½.¹³ One in three 65-year-olds will live to age 90 and one in seven to at least 95.¹⁴)

3. YOUR RISK TOLERANCE

While investing in the market is a risk, it is an effective way to grow assets — particularly for pre-retirees who got a late start to their savings. But how much of your savings *should* be invested in the market?

Calculating your risk tolerance, the degree of variability in investment returns you are willing to withstand, can help you decide. Many factors go into determining your risk tolerance. A financial professional has access to tools that can pinpoint the exact amount of risk that's appropriate for you. But you can get a rough idea of how much risk should be in your portfolio by asking yourself a few questions.

CHECK

HOW MUCH RISK SHOULD YOU TAKE ON?

How much would you feel comfortable losing if your investments had a bad year (or series of years)?

How soon do you want to retire?

(The closer you are, the less risk you want to take on.)

No matter what your risk tolerance is today, it likely will change in the future, and you'll need to rebalance your portfolio (or adjust the amount of investments you have compared to reliable income sources). Reallocating your money often requires reading the fine print. For instance, those in or nearing retirement may want to take funds from their 401(k), which is directly tied to the stock market, to a lower-risk financial product. However, because 401(k)s are tax-deferred, moving them to another type of account could cost you in taxes. A licensed financial professional can work with your tax professional to help ensure your assets are moved as tax efficiently as possible while staying within your risk tolerance.

4

4. AN INCOME GAP

Could the total assets you calculated in Section 2 cover your expenses from Section 1 if you and your spouse lived into your 80s or 90s? If you came up short, you have an income gap.

By taking action sooner rather than later, it is certainly possible to build up your nest egg to where you need it to be before you retire. But if you're anticipating a recession, especially in the time leading up to your retirement or during the early years of your retirement, you may be hesitant to rely too heavily on the stock market.

If you're racing to build up your retirement savings but wary of investing a large chunk of your assets in the stock market, there are other options for a portion of your retirement assets. Financial products, like annuities, allow you to create income with less reliance on the stock market.

Annuities are designed to meet long-term needs for retirement income. When you purchase an annuity, you're purchasing a contract from an insurance company. In exchange for the premium you pay, you receive certain fixed and/or variable interest crediting options that compound interest-tax-deferred until withdrawn.

When you're ready to receive income, an annuity offers a variety of guaranteed payout options.

If you want the potential to earn interest on your premiums — to help catch up on your savings — fixed index annuities could be worth exploring. The fixed index annuity combines the benefit of tax deferral with the potential for interest based on positive changes of an external index, or a measurement of a section of the stock market, without actual participation in the market.

So, how does it work? The insurance company uses a crediting method to track the performance of the index during a specified time period. At the end of each time period, the company calculates the indexed interest. If the result is positive, the annuity is credited interest up to a predetermined amount. If the result is negative, nothing happens and the annuity's value doesn't decline.

A qualified financial professional, particularly one who is independent and has access to a wide selection of annuities, can help you find an FIA that can help you create a source of income for as long as you live, even in a recession.

CHECK

YOUR INCOME GAP

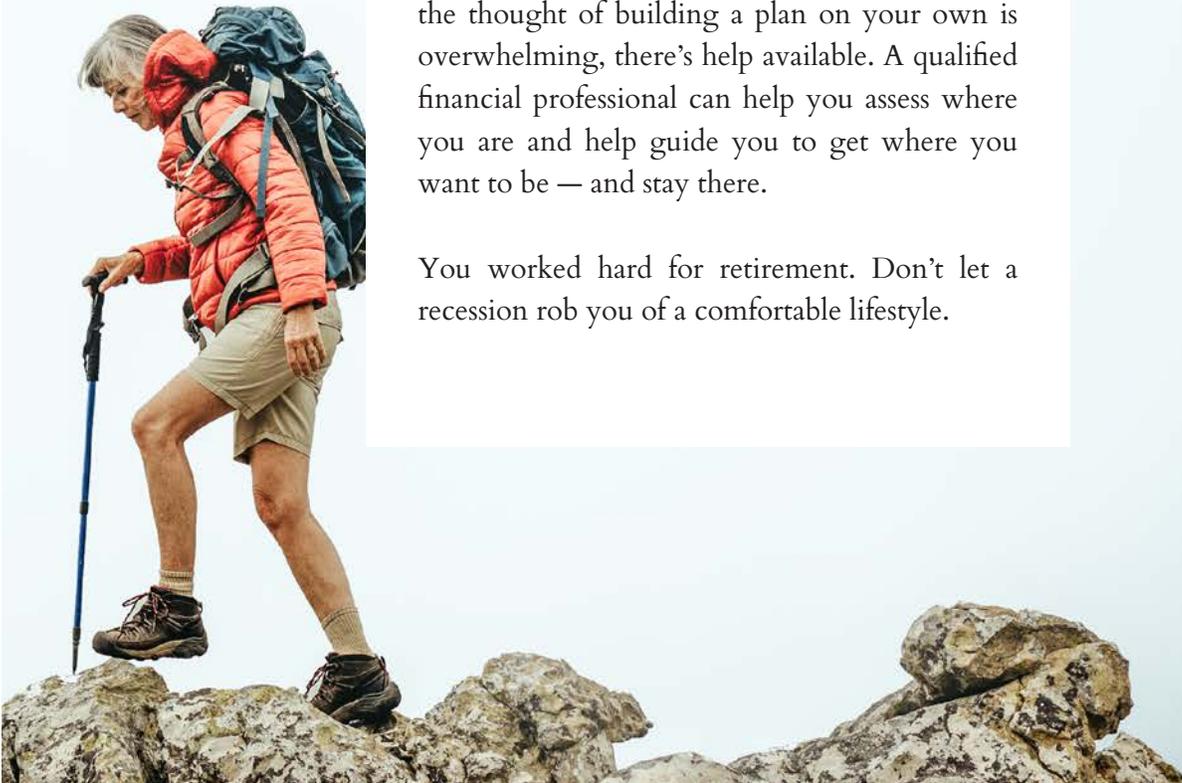

Total assets - [Annual expenses x 20*] = _____

*Average length of retirement, in years¹⁵

DON'T LET THE MARKET DICTATE YOUR LIFESTYLE

You don't need a bull market to guarantee a great retirement. One of the keys to a comfortable lifestyle in any economy is planning ahead. If the thought of building a plan on your own is overwhelming, there's help available. A qualified financial professional can help you assess where you are and help guide you to get where you want to be — and stay there.

You worked hard for retirement. Don't let a recession rob you of a comfortable lifestyle.
