Advice For Life

Hidden Gem: HSAs in Retirement

When saving for retirement, you're probably aware of the benefits of using tax-preferred accounts such as 401(k)s and IRAs. But you may not be aware of another type of tax-preferred account that may prove very useful,

not only during your working years but also in retirement: the health savings account (HSA).

HSA in a nutshell

An HSA is a tax-advantaged account that's paired with a high-deductible health plan (HDHP). You can't establish or contribute to an HSA unless you are enrolled in an HDHP. An HDHP provides "catastrophic" health coverage that pays benefits only after you've satisfied a high annual deductible. However, you can use funds from your HSA to pay for health expenses not covered by the HDHP.

Contributions to an HSA are generally either tax deductible if you contribute them directly, or excluded from income if made by your employer. HSAs typically offer several savings and investment options. Your employer will likely indicate which funds or investment options are available if you get your HSA through work. All investments are subject to market fluctuation, risk, and loss of principal. When sold, investments may be worth more or less than their original cost.

Withdrawals from the HSA for qualified medical expenses are free of federal income tax. However, money you take out of your HSA for nonqualified expenses is subject to ordinary income taxes plus a 20% penalty, unless an exception applies.

Benefits of an HSA

An HSA can be a powerful savings tool. First, it may be the only type of account that allows for federal income tax-deductible or pre-tax contributions coupled with tax-free withdrawals. Depending upon the state, HSA contributions and earnings could be subject to state taxes. In addition, because there's no "use it or lose it" provision, funds roll over from year to year. And the account is yours, so you can keep it even if you change employers or lose your job.

HSA as a retirement tool

During your working years, if your health expenses are relatively low, you may be able to build up a significant balance in your HSA over time. You can even let your money grow until retirement, when your health expenses are likely to be greater.

In retirement, medical costs may prove to be one of your biggest expenses. Although you can't contribute to an HSA once you enroll in Medicare (it's not considered an HDHP), an HSA can help you pay for qualified medical expenses, allowing you to preserve your retirement accounts for other expenses (e.g., housing, food, entertainment, etc.). And an HSA may provide other benefits as well.

- An HSA can be used to pay for unreimbursed medical costs on a tax-free basis, including Medicare premiums (although not Medigap premiums) and long-term care insurance premiums, up to certain limits.
- You can repay yourself from your HSA for qualified medical expenses you incurred in prior years, as long as the expense was incurred after you established your HSA, you weren't reimbursed from another source, and you didn't claim the medical expense as an itemized deduction.
- And once you reach age 65, withdrawals for nonqualified expenses won't be subject to the 20% penalty. However, the withdrawal will be taxed as ordinary income, similar to a distribution from a 401(k) or traditional IRA.
- At your death, if your surviving spouse is the designated beneficiary of your HSA, it will be treated as your spouse's HSA.

HSAs aren't for everyone. If you have relatively high health expenses, especially within the first year or two of opening your account, you could deplete your HSA or even face a shortfall. In any case, be sure to review the features of your health insurance policy carefully. The cost and availability of an individual health insurance policy can depend on factors such as age, health, and the type and amount of insurance.

Tax Scams to Watch Out For

It is important to remember that the IRS will never initiate contact with you by email to request personal or financial information. This includes any type of electronic communication, such as text messages and social media.

While tax scams are especially prevalent during tax season, they can take place any time during the year. As a result, it's in your best interest to always be vigilant so you don't end up becoming the victim of a fraudulent tax scheme.

Here are some of the more common scams to watch out for.

Phishing

Phishing scams usually involve unsolicited emails or fake websites that pose as legitimate IRS sites to convince you to provide personal or financial information. Once scam artists obtain this information, they use it to commit identity or financial theft.

It is important to remember that the IRS will never initiate contact with you by email to request personal or financial information. This includes any type of electronic communication, such as text messages and social media. If you get an email claiming to be from the IRS, don't respond or click any of the links; instead forward it to phishing@irs.gov.

Phone scams

Beware of callers claiming that they're from the IRS. They may be scam artists trying to steal your money or identity. This type of scam typically involves a call from someone claiming you owe money to the IRS or that you're entitled to a large refund. The calls may also show up as coming from the IRS on your Caller ID, be accompanied by fake emails that appear to be from the IRS, or involve follow-up calls from individuals saying they are from law enforcement. Sometimes these callers may threaten you with arrest, license revocation, or even deportation.

If you think you might owe back taxes, contact the IRS for assistance at irs.gov. If you don't owe taxes and believe you have been the target of a phone scam, you should contact the [Treasury Inspector General](http://www.treasury.gov) and the [Federal Trade Commission](http://www.ftc.gov) to report the incident.

Tax return preparer fraud

During tax season, some individuals and scam artists pose as legitimate tax preparers, often promising unreasonably large or inflated refunds. They try to take advantage of unsuspecting taxpayers by committing refund fraud or identity theft. It is important to choose a tax preparer carefully, since you are legally responsible for what's on your return, even if it's prepared by someone else.

A legitimate tax preparer will generally ask for proof of your income and eligibility for credits and deductions, sign the return as the preparer, enter the Preparer Tax Identification Number, and provide you with a copy of your return.

Fake charities

Scam artists sometimes pose as a charitable organization in order to solicit donations from unsuspecting donors. Be wary of charities with names that are similar to more familiar or nationally known organizations, or that suddenly appear after a national disaster or tragedy. Before donating to a charity, make sure that it is legitimate. There are tools at irs.gov to assist you in checking out the status of a charitable organization, or you can visit charitynavigator.org to find more information about a charity.

Tax-related identity theft

Tax-related identity theft occurs when someone uses your Social Security number to claim a fraudulent tax refund. You may not even realize you've been the victim of identity theft until you file your tax return and discover that a return has already been filed using your Social Security number. Or the IRS may send you a letter indicating it has identified a suspicious return using your Social Security number. If you believe you have been the victim of tax-related identity theft, you should contact the IRS Identity Protection Specialized Unit at 800-908-4490 as soon as possible.

Stay one step ahead

The best way to avoid becoming the victim of a tax scam is to stay one step ahead of the scam artists. Consider taking the following precautions to keep your personal and financial information private:

- Maintain strong passwords
- Consider using two-step authentication
- Keep an eye out for emails containing links or asking for personal information
- Avoid scam websites
- Don't answer calls when you don't recognize the phone number

Finally, if you are ever unsure whether you are the victim of a scam, remember to trust your instincts. If something sounds questionable or too good to be true, it probably is.

Key Retirement and Tax Numbers for 2019

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans and various tax deduction, exclusion, exemption, and threshold amounts. Here are a few of the key adjustments for 2019.

Employer retirement plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$19,000 in compensation in 2019 (up from \$18,500 in 2018); employees age 50 and older can defer up to an additional \$6,000 in 2019 (the same as in 2018).
- Employees participating in a SIMPLE retirement plan can defer up to \$13,000 in 2019 (up from \$12,500 in 2018), and employees age 50 and older can defer up to an additional \$3,000 in 2019 (the same as in 2018).

IRAs

The combined annual limit on contributions to traditional and Roth IRAs increased to \$6,000 in 2019 (up from \$5,500 in 2018), with individuals age 50 and older able to contribute an additional \$1,000. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA is phased out for the following modified adjusted gross income (AGI) ranges:

	2018	2019
Single/head of household (HOH)	\$63,000 - \$73,000	\$64,000 - \$74,000
Married filing jointly (MFJ)	\$101,000 - \$121,000	\$103,000 - \$123,000
Married filing separately (MFS)	\$0 - \$10,000	\$0 - \$10,000

Note: The 2019 phaseout range is \$193,000 - \$203,000 (up from \$189,000 - \$199,000 in 2018) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered.

The modified AGI phaseout ranges for individuals to make contributions to a Roth IRA are:

	2018	2019
Single/HOH	\$120,000 - \$135,000	\$122,000 - \$137,000
MFJ	\$189,000 - \$199,000	\$193,000 - \$203,000
MFS	\$0 - \$10,000	\$0 - \$10,000

Estate and gift tax

- The annual gift tax exclusion for 2019 is \$15,000, the same as in 2018.
- The gift and estate tax basic exclusion amount for 2019 is \$11,400,000, up from \$11,180,000 in 2018.

Kiddie tax

Under the kiddie tax rules, unearned income above \$2,200 in 2019 (up from \$2,100 in 2018) is taxed using the trust and estate income tax brackets. The kiddie tax rules apply to: (1) those under age 18, (2) those age 18 whose earned income doesn't exceed one-half of their support, and (3) those ages 19 to 23 who are full-time students and whose earned income doesn't exceed one-half of their support.

Standard deduction

	2018	2019
Single	\$12,000	\$12,200
HOH	\$18,000	\$18,350
MFJ	\$24,000	\$24,400
MFS	\$12,000	\$12,200

Note: The additional standard deduction amount for the blind or aged (age 65 or older) in 2019 is \$1,650 (up from \$1,600 in 2018) for single/HOH or \$1,300 (the same as in 2018) for all other filing statuses. Special rules apply if you can be claimed as a dependent by another taxpayer.

Alternative minimum tax (AMT)

	2018	2019
Maximum AMT exemption amount		
Single/HOH	\$70,300	\$71,700
MFJ	\$109,400	\$111,700
MFS	\$54,700	\$55,850
Exemption phaseout threshold		
Single/HOH	\$500,000	\$510,300
MFJ	\$1,000,000	\$1,020,600
MFS	\$500,000	\$510,300
26% rate on AMTI* up to this amount, 28% rate on AMTI above this amount		
MFS	\$95,550	\$97,400
All others	\$191,100	\$194,800

*Alternative minimum taxable income

Should I consider requesting a deferment or forbearance for my federal student loans?

Did you take on a large amount of debt to pay for college, and are you struggling to pay it off? If so, you are not alone. According to the Federal Reserve, 20% of individuals with outstanding student loans were behind on their payments in 2017.¹ You may want to consider requesting a deferment or forbearance if you are having difficulty keeping up with your federal student loan payments.

Provided certain eligibility requirements are met, both a deferment and a forbearance allow you to temporarily stop making payments or temporarily reduce your monthly payment amount for a specified time period. The key difference between the two is that with a deferment, you may not have to pay back any interest that accrues on the loan during the deferment period, depending on the type of loan you have. During a forbearance, you are responsible for paying any accrued interest on the loan, regardless of the type of loan you have.

In order to obtain a deferment or forbearance, you will need to submit a request to your loan servicer. Most deferments and forbearances

are granted for a specific time period (e.g., six months), and you may need to reapply periodically to maintain your eligibility. In addition, there is usually a limit to the number of times they are granted over the course of your loan. If you meet the eligibility requirements for a mandatory forbearance (e.g., National Guard duty), your lender is required to grant you a forbearance.

Whenever interest accrues on a loan during a deferment or forbearance, you can either pay the interest as it accrues, or it can be added to the overall principal balance of the loan at the end of the deferment or forbearance period. It is important to remember that if you don't pay the interest on your loans and allow it to accrue, the total amount you repay over the life of your loan will be higher. As a result, you should weigh the pros and cons of requesting a deferment or forbearance and consider your repayment options. For more information on your federal student loan repayment options, visit studentaid.ed.gov.

What is the federal funds rate?

The federal funds rate is the interest rate at which banks lend funds to each other from their deposits at the Federal Reserve (the Fed), usually overnight, in order to meet federally mandated reserve requirements. Basically, if a bank is unable to meet its reserve requirements at the end of the day, it borrows money from a bank with extra reserves. The federal funds rate is what banks charge each other for overnight loans. This rate is referred to as the federal funds effective rate and is negotiated between borrowing and lending banks.

The Federal Open Market Committee sets a target for the federal funds rate. The Fed does not directly control consumer savings or credit rates directly; it can't require that banks use the federal funds rate for loans. Instead, the Fed lowers the federal funds rate by buying government-backed securities (usually U.S. Treasuries) from banks, which adds to the banks' reserves. Having excess reserves, banks will lower their lending rates for overnight loans in order to make some interest on the excess reserves. To raise rates, the Fed sells securities to banks, decreasing the banks'

reserves. If enough banks need to borrow to meet overnight reserve requirements, banks with extra reserves will raise their lending rates.

The federal funds rate serves as a benchmark for many short-term rates, such as savings accounts, money market accounts, and short-term bonds. Banks also base the prime rate on the federal funds rate. Banks often use the prime rate as the basis for interest rates on deposits, bank loans, credit cards, and mortgages.

The FDIC insures CDs and bank savings accounts, which generally provide a fixed rate of return, up to \$250,000 per depositor, per insured institution. The principal value of bonds may fluctuate with market conditions. Bonds redeemed prior to maturity may be worth more or less than their original cost. Investments seeking to achieve higher yields also involve a higher degree of risk. U.S. Treasury securities are backed by the full faith and credit of the U.S. government as to the timely payment of principal and interest.
