

In this week's recap: Dow Jones Industrial Average hits 30,000 milestone in response to promising vaccine news and lessening political uncertainty; former Fed chair Janet Yellen nominated as Secretary of the Treasury.

Weekly Economic Update

Presented by RBF Wealth Advisors, November 30, 2020

THE WEEK ON WALL STREET

Stocks surged last week, ignited by another COVID-19 vaccine announcement, encouraging economic data, and the easing of political uncertainty.

The Dow Jones Industrial Average rose 2.21%, while the Standard & Poor's 500 added 2.27%. The Nasdaq Composite index, which has led all year, gained 2.96%. The MSCI EAFE index, which tracks developed overseas stock markets, climbed 1.54%.^{1,2,3}

DOW BREAKS 30,000

For the third consecutive week, markets opened on Monday to yet another announcement of a potential COVID-19 vaccine.

Stock prices found additional support on news that President-elect Biden would be nominating Janet Yellen, the former Chair of the Federal Reserve, to be Secretary of the Treasury. Investors reacted well to the choice, encouraged by her previously voiced support for greater fiscal stimulus and relieved that a candidate less antagonistic to the industry was selected.

Positive momentum continued into the following day, driving the Dow Jones Industrial Average, S&P 500 index, and the Russell 2000 to record high levels, with the Dow closing above the 30,000 milestone.⁴

Stocks eased off their highs in pre-Thanksgiving trading, though they recovered some of those losses on Friday, as the S&P 500 and NASDAQ Composite closed with fresh record highs.⁵

A MICROCOSM OF THE ECONOMY

The economic outlook has been difficult to figure out due to conflicting signals. One day it's a historic jump in economic growth; another day it's a record high in new COVID-19 infections. Last week was a good illustration of this. Reports of healthy consumer spending, a solid rise in durable

goods orders, and sales of new homes remaining near almost-14-year highs were balanced by a jump in new jobless claims, a decline in household income, and new state and local COVID-related restrictions.⁶

Last week investors chose to see the glass half full and look past the near-term challenges the economy faces.

TIP OF THE WEEK

Self-employed? Have your accountant look at your balance sheet and profit-and-loss statement before 2020 ends. Some tax-saving strategies may come to mind, and an up-to-date set of books means less work for your tax preparer.

THE WEEK AHEAD: KEY ECONOMIC DATA

Tuesday: Institute for Supply Management (ISM) Manufacturing Index.

Wednesday: Automated Data Processing (ADP) Employment Report.

Thursday: Jobless Claims, Institute for Supply Management (ISM) Services Index.

Friday: Employment Situation, Factory Orders.

Investing involves risks, and investment decisions should be based on your own goals, time horizon, and tolerance for risk. The return and principal value of investments will fluctuate as market conditions change. When sold, investments may be worth more or less than their original cost.

The forecasts or forward-looking statements are based on assumptions, may not materialize, and are subject to revision without notice.

The market indexes discussed are unmanaged, and generally, considered representative of their respective markets. Index performance is not indicative of the past performance of a particular investment. Indexes do not incur management fees, costs, and expenses. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results.

The Dow Jones Industrial Average is an unmanaged index that is generally considered representative of large-capitalization companies on the U.S. stock market. Nasdaq Composite is an index of the common stocks and similar securities listed on the Nasdaq stock market and is considered a broad indicator of the performance of technology and growth companies. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) and serves as a benchmark of the performance of major international equity markets, as represented by 21 major MSCI indexes from Europe, Australia, and Southeast Asia. The S&P 500 Composite Index is an unmanaged group of securities that are considered to be representative of the stock market in general.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
