2 *LifeSpan*[®] retirement income model portfolios are illustrations only and are not intended as investment advice or recommendations for any individual. The models have been developed as general examples for investors with various risk profiles. A participant's own portfolio selection may vary depending on personal objectives, other assets held outside of the plan, time horizon, and risk tolerance. The final decision regarding investment choices is the participant's, based on his or her individual situation, which may include factors and circumstances beyond the scope of these models and evaluation tools. The principal value of the investments is not guaranteed at any time, included the intended year of distribution.

3 Based on the 2035 Conservative *LifeSpan*[®] Asset Allocation Model. A participant's actual fund expenses could differ according to the participants investment elections.

An investor should carefully consider the investment objectives, risks, and charges and expenses of the investment options in the plan before investing. For mutual funds and collective investment trust, the prospectus or similar document contains this and other important information and should be read carefully before investing or sending money. Investment values will fluctuate with changes in market conditions so that upon withdrawal your investment may be worth more or less than the amount originally invested. For a prospectus or similar disclosure document, please contact your Lincoln representative.

The principal value of the investments in the models will fluctuate with market conditions and is not guaranteed at any time.
